#### 1 SUMMARY

The Community-based Heritage Study is the first study undertaken to identify the environmental heritage of Walgett Shire. At present the Shire has no items listed under any planning instrument.

Our environmental heritage may be defined as *valuable* places or items that remain from the past. It follows that they should be conserved, so that present and future generations may understand and enjoy them. The Study used the NSW Heritage assessment procedure, which is based on the following seven criteria, to assess whether each potential item has heritage significance:

- Historical significance
- Historical association significance
- Aesthetic significance
- Social significance
- Technical/Research significance
- Rarity
- Representativeness

The community-based approach has been increasingly used in heritage studies in rural New South Wales. It relies on a partnership between a qualified heritage consultant, as Coordinator, and members of the community, contributing their knowledge, undertaking research, and assisting with the assessment of potential items. The principal advantage of this approach in rural areas is that it uses local knowledge which outside experts may not have, and cannot even obtain because of geographical limitations.

The standard approach was adapted to local circumstances. An important factor was the wide geographical spread of centres of population across the Shire, which required the meetings and workshops to be repeated in up to five locations.

The Study commenced with a professionally written thematic history by Terry Kass. It provided a framework for identifying heritage items, by identifying the processes and forces which have shaped the area's landscapes and townscapes, leaving physical evidence of past activities and lifestyles. For each sub-theme so identified, an indicative list was advanced of the types of places of which examples were likely to remain in Walgett. This assisted the volunteers to identify places whose importance might not otherwise have become apparent, and enabled the historical significance of all the identified items to be better understood.

As information was accumulated through several rounds of community workshops across the Shire and street by street surveys of the towns and villages by the Coordinator, it was recorded on listing sheets. The Study Committee worked through a comparative evaluation, adding and deleting items, and the owners were then invited to comment on the listing sheets. A few items were added and deleted, and the sheets amended as necessary for inclusion in this report.

Obviously buildings in towns and villages are far more easily identified and assessed from public streets than are rural items. Accordingly a list of rural potential rural items known to the Committee was developed. The owners were approached for their comments and further information. Several, including three members of the Committee invited further study of their properties, and items considered to meet the criteria are included in the Study.

The Committee formed the view that most items which are primarily significant for Aboriginal people are unlikely to be at risk through development, and are better projected by not being publicly listed in an instrument of development control. Consequently no such items are recommended for listing.

There are cemeteries in most of the towns and villages of the Shire together with numerous lone graves and small groups of graves. These are clearly part of the Shire's heritage. However, they have been exhaustively recorded, and as they are not at risk from development, and as the resources available to the study were limited, they were not examined further.

Seven items under consideration were destroyed during the course of the Study. A further nineteen items were nominated but could not be investigated within the constraints of the Study.

Much of the physical evidence of the Shire's early history has been lost. Fragile early buildings, such as slab huts, were never intended to last. More permanent timber buildings have been lost to fire. The reactive soils on which agriculture relies provide poor foundations, especially for brick buildings, many of which have been lost to structural damage. Mechanisation, modern transport and the general drift of population from isolated properties to villages, and thence to the towns and major cities, have left farm buildings, homesteads, shops, houses and churches, and entire villages without an ongoing economic use. Lack of use leads inevitably to a lack of maintenance, and ultimately the loss of the item. Where there is a continuing use buildings are frequently altered.

These losses make the Shire's remaining heritage all the more precious, and the Study has revealed a surprising variety of valuable items in the towns, villages and rural areas across the whole Shire. Some are so old that they cannot be dated. As is the case across rural Australia, homesteads and outbuildings reveal early life on the land, while churches, houses, shops, hotels and halls reflect the growth of towns and villages. Other items are particularly characteristic of the region and Walgett Shire in particular: tanks (reservoirs), bore baths, and levee banks show how water has been manipulated, while miners' huts, mine sites and the entire landscape of the Preserved Fields continue to tell the story of opal mining.

The number of items recommended for listing is comparable with those identified by recent studies in other shires in the region.

#### 1.1 Recommendations

The Study Committee recommends that Council

- 1. List the items identified by the Heritage Study as items of environmental heritage in a schedule to the Local Environmental Plan.
- 2. List the Preserved Opal Fields as a heritage conservation area in the Local Environmental Plan.
- 3. Further investigate items identified, but not assessed, in section 4.13 of the Heritage Study as "*Items for further study*".
- 4. Consult with the Aboriginal community and undertake a study of Aboriginal heritage in the Shire.

People are sometimes apprehensive about heritage listing of their property, even though they may fully appreciate its heritage value. Such concerns are largely based on misunderstandings. Briefly, listed properties can be altered, free advice on proposed alterations is available, and owners of listed properties are eligible for grants to assist with repairs and maintenance.

While in progress the Study has made an important contribution to the wider objectives of the heritage program. The various public and Committee meetings, newspaper articles and communications with owners of potential items have all served to widen an appreciation of heritage concepts and the heritage system. Many of the items identified have benefited from grants from the Local Heritage Fund, which assists owners with practical conservation work.

The Study was jointly funded by Walgett Shire Council and the Heritage Office, NSW Department of Planning, and was completed with invaluable voluntary support from the Study Committee and the community of Walgett Shire.

#### **2 INTRODUCTION**

#### 2.1 Initiation and purpose of the Study

The Community-based Heritage Study is the first study undertaken of the environmental heritage of the Shire. It was jointly funded by Walgett Shire Council and the Heritage Office of the New South Wales Department of Planning.

At present the Shire has no items listed under the Heritage Act (i.e. State-listed items) or any local planning instrument. Only the Two Mile Creek Rail Bridge at Walgett<sup>1</sup> is listed by a State Government agency under section 170 of the Heritage Act. Nine items are registered on the Register of the National Estate, together with four indicative places currently under assessment (Appendix 1). There are listed by the Australian Heritage Commission. There are six non-statutory listings by the National Trust of Australia (Appendix 2) and none by any other heritage body.

This report is submitted to Council with recommendations that the items of environmental heritage identified in it be listed in a Schedule to the forthcoming Local Environmental Plan, which will be made under the Environmental Planning and Assessment Act. Several items have also been nominated to the Heritage Office as being of State significance. Endorsement of these findings by the Heritage Council would lead to the listing of State-significant items under the Heritage Act.

The Study was first mooted when the author was appointed as the Shire's first Heritage Adviser. It has taken longer than expected. One reason is the dispersal of a very diverse range potential items across three major towns, a number of villages and localities, vast rural areas and opal fields. Another was the technical difficulties of establishing the legal description of the parcel of land on which each potential item is located. Even in the towns, this was far from being immediately apparent, as there are few street numbers, many vacant blocks. This difficulty was eventually overcome as Council's geographic information system was made operational. Finally, much time has been taken to make the listing sheets informative, with historical notes covering the context as well as the specifics of the item, and rigorous Statements of Significance, as these may in future be incorporated in the statutory listings.

#### 2.2 The Study Committee

The Study commenced with public meetings in five locations, from which a number of volunteers came forward, but a formal Study Committee was not set up at that stage. In 2003, Council established a Heritage Committee, one of whose roles was to make recommendations to Council on the listing of heritage items. After Council was dismissed and an Administrator appointed, the Heritage Committee was dissolved, but its members continued to provide local advice to the Heritage Adviser.

Council at a ~ 2009.DOCX

There are two partially completed entries, apparently for the one bridge.
Report of the Community Based Heritage Study of Walgett Shire, April 2008, version 1.3, as amended by Walgett Shire

Members of the former committee included:

Ms. Barbara Moritz

Mrs. Joan Treweeke

Ms. Marcia Barker

Mrs. Leila Osborn

Mrs. Noreen Dunn

Mrs. Elaine Duncan

Mrs. Margaret Bow

Mrs. Helen Allerton

Mrs. Dianne Gale

Mrs. Jocelyn Cameron

Mr. Matthew Goodwin, Manager, Planning and Regulation, Walgett Shire Council

#### 2.3 Authorship

This Report was written by Graham Hall, B. Arch., M. Bldg. Sc., MBA, Grad. Cert. Herit. Cons., RAIA, Heritage Adviser to Walgett Shire Council, as Coordinator for the Study, with advice and assistance from the former Heritage Study Committee members.

It forms one volume of the Study, the Thematic History of Walgett Shire, by Terry Kass, being the other volume.

#### 2.4 Acknowledgements

The author would like to acknowledge the support and assistance of all the members of the Study Committee; and the many individuals and community groups who have participated in workshops. In particular, he is indebted to Mrs. Noreen Dunn, Secretary, Walgett and District Historical Society, Ms. Barbara Moritz, Secretary, Lightning Ridge Historical Society, Mrs. Marlene Cutler of Collarenebri, and Mrs. Helen Allerton of Come-by-Chance.

Mrs. Dunn undertook comprehensive research using old rate books to establish what buildings existed in five towns in the early and middle 20<sup>th</sup> century. This enabled the age of many buildings to be ascertained. Ms. Moritz and Mrs. Cutler both delved into their extensive records and drew on local knowledge to provide information on buildings and other items, and Ms. Moritz also conducted the author on numerous visits to sites around Lightning Ridge. Mrs. Allerton provided extensive information on rural items.

Mrs. Joan Treweeke, a former Councillor, was instrumental in the appointment of a Heritage Adviser and in initiating the Study, and was an enthusiastic and inclusive Chair of the Heritage Committee.

Mr. Matthew Goodwin, Manager, Planning and Development, Walgett Shire Council, provided sound judgement on strategic planning issues, the considerable technical

expertise that was necessary to integrate heritage into the geographical information system, and valuable administrative support for the Study.

Terry Kass's Thematic History of Walgett Shire provided a fascinating account of the changes that have occurred over time, and a very sound framework for both identifying and assessing potential heritage items.

This Report was written by Graham Hall, B. Arch., M. Bldg. Sc., MBA, Grad. Cert. Herit. Cons., RAIA, Heritage Adviser to Walgett Shire Council, as Coordinator for the Study, with advice and assistance from the Study Committee..

Finally, they appreciate the initiative of Walgett Shire Council and the NSW Heritage Office in undertaking the Study and supporting the community-based approach to it.

#### 3 HERITAGE CONCEPTS

#### 3.1 Heritage values

Heritage may be defined as *valuable things from the past*. Heritage can be seen broadly as including many aspects of culture – such as art, music, dance, language, literature, philosophy, religion, political institutions – as well as aspects of the physical environment, with which this report is concerned. The physical environment in turn comprises the *natural landscape* – untouched by man – and the *cultural landscape* – any place that has been modified by human activity. Heritage items in Australia are sometimes divided into indigenous items (made by Aboriginal and Torres Strait Islander people) and non-indigenous items (made after European settlement in 1788.)

Buildings are the most obvious examples of places in the cultural landscape, but streetscapes, engineering structures, graves, movable items, and rural landscapes are other examples. (In practice, the cultural and natural landscapes are not always easily distinguished, at least until a place has been studied in some depth.)

If our environmental heritage comprises *valuable* places or items that remain from the past, it follows that they should be conserved, so that present and future generations may understand and enjoy them. But we all have different *values*. If we did not, there would be no need for heritage controls, such as listing in Local Environmental Plans.

#### 3.2 The Burra Charter

Although values are individual and subjective, there is a rigorous method or framework for considering them: the *Burra Charter* (see Appendix 3). This has been developed by Australia ICOMOS (International Council on Monuments and Sites, linked to UNESCO).

The key concept is an item's *significance*. What does this item *signify*, what *sign* does it make, what *signal* does it send to us about our past - about why our culture and physical environment are as they are?

The *Burra Charter* gives five bases of significance. An item may be significant in one or more of these ways.

**Historical significance** arises when an item is important in the course of an area's history or has strong associations with a historical figure or event.

An item can have **aesthetic significance** if it has visual appeal or demonstrates a particular architectural style.

**Scientific value** is present if the item yields, or has the potential to yield, technical information useful in research, for example about history, anthropology, construction techniques, or the natural world.

**Social significance** means that people hold a place in particular esteem: it is a focus of community sentiment, and there would be a sense of loss if it were no longer there.

**Spiritual significance** was introduced as a distinct category in the 1999 revision of the Burra Charter. It relates to places that have meaning at a spiritual level.

The above terms define the *nature* of an item's significance. Another dimension is the *degree* of significance. On this dimension, an item may be significant because it is **rare** or **representative**, or sometimes both. **Rarity** means signifying a rare, endangered or unusual aspect of history or the environment. A **representative** means being a fine example of an important class of items.

A third dimension is the *level* of significance. It should be noted that the level is not a hierarchy of importance, but is concerned with the geographical spread of the people to whom an item is significant, e.g. **local**, **state**.

Expert studies over the years have relied on this three-dimensional matrix, or variations of it, and it is particularly appropriate for assessing complex items and heterogeneous sets of items.

#### 3.3 The NSW Heritage Assessment Procedure

The Heritage Amendment Act 1998 defines heritage significance as the historical, scientific, cultural, social, archaeological, architectural, natural or aesthetic value of the item. The NSW Heritage Council has used its powers under the Act to gazette the following seven *criteria*. They are clearly derived from the Burra Charter, although there is no explicit distinction between the concepts of nature and degree of significance. The assessment in terms of importance to the *area* or *NSW* refers to the *level* of significance.

Historical significance SHR criteria (a)	An item is important in the course, or pattern, of NSW's or the area's cultural or natural history
Historical association significance SHR criteria (b)	An item has strong or special association with the life or works of a person, or group of persons, of importance in NSW's or the area's cultural or natural history.
Aesthetic significance SHR criteria (c)	An item is important in demonstrating aesthetic characteristics &/or a high degree of creative or technical achievement in NSW or the area
Social significance SHR criteria (d)	An item has strong or special association with a particular community or cultural group in NSW or the area for social, cultural or spiritual reasons.
Technical/Research significance SHR criteria (e)	An item has potential to yield information that will contribute to an understanding of NSW's or the area's cultural or natural history.
Rarity SHR criteria (f)	An item possesses uncommon, rare or endangered aspects of NSW's or the area's cultural or natural history.
Representativeness SHR criteria (g)	An item is important in demonstrating the principal characteristics of a class of NSW's or the area's cultural or natural places or cultural or natural environments.

This framework is the basis of the *NSW heritage assessment procedure*, in which rigorous, though necessarily subjective, guidelines for inclusion or exclusion are set down. This procedure has been used for this report.

It is important to note that while the *condition* of a building or item can help in understanding its history, and is a factor in managing a significant item, condition is not relevant to assessing its significance. Whether an item is *intact*, (has not been altered) or retains its *integrity* (i.e. alterations have not diminished its value) are relevant considerations.

#### 3.4 The implications of heritage listing

Heritage listing means including an item on a Schedule of Items of Environmental Heritage within a planning instrument such as a Local Environmental Plan, made under the Environmental Planning and Assessment Act. Items of State significance are listed under the Heritage Act.

People are sometimes apprehensive about heritage listing of their property, even though they may fully appreciate its heritage value. Such concerns are largely based on misunderstandings. The actual implications of heritage listing are as follows:

- Listing is a public recognition of the importance of an item in the life of the community.
- Owners of heritage items are eligible to apply for assistance with maintenance etc. from Council's Heritage Fund.
- The Heritage Office may fund rebates on Council rates or land tax, subject to conditions.
- Several studies have shown that listing can **increase the value of a property** (but owners can apply for heritage valuations to ensure that rates are not increased).
- Free architectural advice on heritage items is available from Council's Heritage Adviser.
- Listing an item provides a **safeguard against unsympathetic development nearby**.
- A listed item may not be demolished, except in very unusual circumstances, but it can be altered or extended, as long as the changes are sympathetically designed. Heritage items will survive better if they are used, which sometimes requires adapting them for new purposes.
- If a new development is proposed on a site containing a heritage-listed building, certain **planning controls** that would otherwise apply (for example, on the use of a building, the area of the new development, and parking requirements) may be relaxed, as long as the listed item is conserved.
- There is no requirement to maintain a listed item, any more than an unlisted property (except for State-listed items)
- There is no requirement to open a listed item to the public.

#### 4 METHOD

#### 4.1 The NSW heritage management system

The previous section outlines the philosophical and theoretical basis of heritage significance. The overarching framework of the Study, of which the assessment of individual items is part, is the *NSW heritage management system*, which is summarised in the following extract from the Heritage Office publication *Assessing Heritage Significance*:

The NSW Government is responsible for the management of our cultural and natural heritage in partnership with local councils and the community. The NSW heritage management system consists of three steps in managing individual heritage items:

- investigate significance
- assess significance
- manage significance

The NSW Heritage Manual explains these steps, which apply to all kinds of heritage items, from individual houses and movable items to archaeological and industrial sites, conservation areas, landscapes and natural areas. They also apply to items of any level of significance, from local heritage significance to world heritage significance. In practical terms, however, the vast majority of items managed in New South Wales will be of local significance. A smaller number will be of State significance. The chart below summarises the processes in the NSW heritage management system.

#### Step 1 > INVESTIGATE significance

- Investigate the historical context of the item or study area
- Investigate the community's understanding of the item
- Establish local historical themes and relate them to the State themes
- Investigate the history of the item
- Investigate the fabric of the item

#### Step 2 > ASSESS significance

- Summarise what you know about the item
- Describe the previous and current uses of the item, its associations with individuals or groups and its meaning for those people
- Assess significance using the NSW heritage assessment criteria
- Check whether you can make a sound analysis of the item's heritage significance
- Determine the item's level of significance

- Prepare a succinct statement of heritage significance
- Get feedback
- Write up all your information

#### Step 3 > MANAGE significance

- Analyse the management implications of the item's level of significance
- Analyse the constraints and opportunities arising out of the item's significance
- (including appropriate uses)
- Analyse owner and user requirements
- Prepare conservation and management recommendations
- If any obvious options are not suitable, explain why
- Get feedback from the community
- Analyse statutory controls and their relationship to the item's significance
- Recommend a process for carrying out the conservation and management strategies

The Community-based Heritage Study covers steps 1, investigation, and step 2, assessment. Its recommendations are directed towards step 3, management, which is of course an ongoing process.

#### 4.2 Typical Community-based Heritage Study Processes

The community-based approach has been increasingly used in country areas of New South Wales. The methodology is fairly well tested, and is described in detail in the NSW Heritage Office publication *Community-based Heritage Studies: a Guide*. The summary of the process in that document is reproduced at Appendix 4. It relies on a partnership between a qualified heritage consultant, as Coordinator, and members of the community in the study area.

The principal advantage of the community-based approach in rural areas is that it uses local knowledge which outside experts may not have, and cannot even obtain because of geographical limitations. It is not possible to do a street-by-street survey of all potential items in the country, as it is in urban and suburban areas. The community-based approach also assists in identifying social significance, which by definition relies on how the community values a potential item.

#### 4.3 The Thematic History

In the combination of expert and community contributions, a professionally written thematic history is recommended by the Heritage Office. The thematic history provides a framework for identifying heritage items. As Terry Kass explains in the introduction to his Thematic History of Walgett Shire,

It is <u>not</u> meant to be comprehensive history of the Walgett Shire and all aspects of its history. ..... It seeks to identify the processes and developmental forces which have shaped the landscapes and townscapes of the area and have left physical evidence of past activities and lifestyles throughout the district. ......

This history has been organised around major themes or dynamic forces which have moulded the people and environment of Walgett into the form we know today. Any attempt to break up this list of major themes into a host of smaller themes would make this history unreadable. In an attempt to draw the reader's attention to an associated array of forces which have shaped the area within broader themes, a set of sub-themes has been developed for each major theme. Each sub-theme has an indicative list of the types of places or "sites" which are found in other areas and which may have examples in Walgett. The reader is asked to consider these sub-themes and suggest examples in the Walgett area....

#### 4.4 The data required to assess a potential heritage item

During the research phase of the Study The information that was gathered about potential items and the assessments that were arrived at were recorded and are presented on the listing sheets, and recorded on a database using software produced by the Heritage Office. This enables the information to be added to the NSW Heritage Inventory, a state-wide record of listed items.

#### 4.5 Architectural styles

The majority of items are buildings, and the descriptions included references to architectural styles. There are several style classifications in use. The one chosen is that of Apperley, Irving and Reynolds in *A Pictorial Guide to Identifying Australian Architecture*. That work contains a useful discussion on the concept of style, and the relationship between high or contrived styles and vernacular building. The classification system uses the name of a period, e.g. Victorian, Federation, inter-war, followed by a descriptor related to typical combinations of features, e.g. free classical, Arts and Crafts. The authors place these on a continuum between the classical and romantic traditions.

Few buildings in the list were architect-designed; and most are vernacular. Where no particular descriptor is appropriate, only the period is referred to in the listing sheets.

#### 4.6 Adapting the community-based approach to Walgett Shire

As the Guide points out, the approach has to be adapted to local circumstances. The outline provided in the Guide was generally followed. An important factor in Walgett Shire was the wide geographical spread of centres of population within the Shire, which required the initial meetings and subsequent workshops to be repeated in up to five locations.

Another factor was the uneven coverage of the Shire by newspapers. There are two local papers in Lightning Ridge and one in Walgett. The remaining towns, villages and remote properties and opal fields are not served by newspapers, although some have news sheets, generally distributed through the schools.

The Coordinator made an initial exploratory visit to Walgett and Lightning Ridge where meetings with local people and groups thought likely to be interested in the

Study were held to plan the process. To overcome the uneven coverage by and readership of newspapers a notice about the Study was sent to every ratepayer. Subsequently, all who attended any of the workshops or otherwise made contact with the Committee or Coordinator were placed on a list, and were directly invited to be involved in subsequent stages of the project.

After the exploratory meetings, it became clear that the initial workshops would need to be held at several locations. The Coordinator conducted workshops in

- Walgett
- Lightning Ridge
- Collarenebri
- Burren Junction
- Carinda

At these initial workshops, many potential heritage items were suggested. Many people volunteered to assist in various ways.

Terry Kass was then commissioned to write the Thematic History. Once the first draft was complete, a new series of workshops was conducted jointly by him and the Coordinator, in Walgett, Lightning Ridge and Burren Junction. The workshops provided an opportunity for useful comments on the History, including some corrections of fact, and several useful observations and comments, some of which are quoted at some length in the final version.

However the main purpose of this round of workshops was to relate the *themes* in the History to the *physical evidence* of them, which would identify potential heritage items. The style was in the nature of brainstorming. Time did not permit a systematic working through of each theme at that stage.

At about this time, Council established the Walgett Shire Heritage Committee. Members were drawn from the three principal towns (Walgett, Lightning Ridge and Collarenebri), the villages and from rural properties. Several members were involved in the Historical Societies in Walgett and Lightning Ridge, tourism/advancement and Aboriginal groups.

The Heritage Committee met mainly in Walgett, but also in Lightning Ridge and Collarenebri. It had an important role in the administration of the Local Heritage Fund and in heritage promotion. It also assumed the role of the Study Committee. It retained this role after Council was replaced by an Administrator, under whose direction the Heritage Committee, and other committees, were dissolved. Between the workshops described above and the later ones described below, the Study was a standard agenda at meetings of the Committee.

During this phase the complementary roles of the Committee and other interested local people, and of the Coordinator, became clearer. Following the round of workshops based on the Thematic History, all on the mailing list were contacted and more items were suggested. The knowledge of local people, about the history itself, and the very diverse nature and geographical spread of items, was crucial. The

Committee was closely involved in the strategy for communicating with owners of potential items.

The Coordinator was meanwhile able to systematically survey all the towns and villages and much of the Preserved Fields, photographing buildings and other items. As a conservation architect he was able to classify the buildings in terms of architectural style, age, and condition, and identify any alterations.

Many of the potential items that had been nominated at the various workshops, and indeed many identified by the Coordinator, had not been initially related to the distinctive historical themes identified in the Thematic History. The Coordinator set about doing this, and to prepare a first draft list, and basic listing sheets for the items identified.

At this point an important meeting of the Study Committee took place. Here the heritage criteria and the concepts of integrity and condition were intensively reviewed. The process of comparative evaluation was explored rigorously using cases from the Study. In one exercise, the group considered three examples of a distinctive inter-war house design in Walgett. One was intact apart from insect screening to the veranda; another had the veranda partly enclosed, while the third had aluminium windows, enclosed verandas and substantial extensions. The Committee concluded that only the first one met the criteria. This meeting set an appropriate benchmark for the process of comparative evaluation.

The Coordinator then assembled the first draft list and set of listing sheets. Many details remained sketchy at this point. The material formed the basis for a final round of workshops, in Walgett, Lightning Ridge, Burren Junction and Collarenebri, and was posted to those on the mailing list who volunteered to comment as well. These workshops and consultations resulted in a major cull of items that no longer exist, have been too much modified, or on which insufficient information could be found.

At one workshop it was suggested that items needing more investigation than would be possible in the context of the Study should be recorded on a subsidiary list, and this has been done (See section titled "Items for further study").

The Coordinator then set about completing the assessments, obtaining additional information from the Study Committee and the community, especially those people mentioned in the acknowledgements, and from the Thematic History.

At this stage it was considered that enough information had been compiled to contact the owners of 120 items on the draft list other than those owned by Council. A letter was sent, with the relevant listing sheet, together with the information about the implications of heritage listing which appears in 2.4 above. Owners were asked to provide any additional information directly to the Coordinator by phone, letter or email.

It was gratifying that several owners expressed satisfaction with the nominations and provided information. Several telephoned the Coordinator with queries or initial concerns, which were discussed, but only four objections were received, as summarised in Appendix F.

A final meeting of the Committee considered these two items in particular, and new information material to the heritage assessments of several others, and agreed on the addition and deletion of a few items. The present report was then finalised.

Particular mention must be made of how several categories of items were treated. These include Aboriginal items, cemeteries, burial grounds and graves, natural and landscape items, and rural items.

#### 4.7 Aboriginal items

The National Parks and Wildlife Service maintains a confidential list of Aboriginal heritage items. The Register of the National Estate lists four "indigenous places" in Walgett Shire and two Aboriginal cemeteries, but the Department of Environment and Heritage website provides minimal information about the indigenous places. One of the places and both the cemeteries were suggested at workshops.

A number of those who attended the public workshops identified themselves as Aboriginal people attended, particularly in Lightning Ridge. The Coordinator contacted or met with a number of Aboriginal people and groups. There was one Aboriginal member of the Study Committee.

The Committee formed the view that items which are primarily significant for Aboriginal people are unlikely to be at risk through development, and are better projected by not being publicly listed in an instrument of development control. Consequently no such items are recommended for listing. A recommendation on a possible Aboriginal Heritage Study is made.

#### 4.8 Cemeteries, burial grounds and graves

There are cemeteries in most of the towns and villages of the Shire, including Aboriginal cemeteries in Collarenebri and Angledool, together with numerous lone graves and small groups of graves. These are clearly part of the Shire's heritage. However, they have been exhaustively recorded<sup>2</sup>, and as they are not at risk from development, and as the resources available to the present study were limited, they were not examined further.

<sup>&</sup>lt;sup>2</sup> Helen Allerton, Lola Cormie and Marlene Davidson, *Outback Burials, Walgett District*Report of the Community Based Heritage Study of Walgett Shire, April 2008, version 1.3, as amended by Walgett Shire
Council at a ~ 2009.DOCX

#### 4.9 Natural and landscape items

Few natural items or natural landscapes were nominated. Two groups of trees in Walgett were nominated but were found, after consideration, not to meet the criteria. Some others remain on the subsidiary list, for further investigation. They do not appear to be in need of any greater statutory protection than they already have.

#### 4.10 Rural items

Several rural items, such as homesteads, homestead complexes, woolsheds and other ancillary buildings were nominated during the workshops, but it became apparent that the initial nominations did not represent the most significant rural items. Obviously buildings in towns and villages are far more easily identified and assessed from public places than rural items, which are usually remote. Accordingly a list of rural potential rural items was developed on the basis of historical photographs held by the Walgett and District Historical Society and he knowledge of the Committee. The owners were approached for their comments and further information.

Several invited further study of their properties, as had three members of the Study Committee. The Coordinator visited these in early 2007, and items considered to meet the gazetted criteria are included in the Study. Further study of potential rural items is recommended

#### 4.11 Conservation areas

The NSW Heritage Office describes a heritage conservation area as "more than a collection of individual heritage items. It is an area in which the historical origins and relationships between the various elements create a sense of place that is worth keeping." The National Trust defines an urban conservation area as "an area of importance within whose boundaries controls are necessary to retain and enhance its character."

Conservation areas are frequently included in Local Environmental Plans, and sometimes individually listed items, contributory items, neutral and intrusive items are defined, in order to guide development.

Most of the Shire's heritage items are widely scattered. Only two urban areas within the Shire are relatively unaltered, and have a character and sense of place worthy of retention: the village of Carinda, and Alma Street, Burren Junction. The latter has a number of individually significant items. Wilson Street, Collarenebri, has the potential to regain its inter-war character, but this would require a good deal of conservation work.

Consideration was given to recommending the creation of conservation areas in Carinda and Burren Junction. However there is little development pressure in these places, and it is considered that the provisions of the standard Local Environmental

<sup>&</sup>lt;sup>3</sup> NSW Heritage Office, Conservation Areas: Guidelines for Managing Change in Heritage Conservation Areas, 1996.

plan covering development in the vicinity of a heritage item would provide a simpler means of control.

The only heritage conservation area recommended is the Preserved Opal Fields, as shown in Figure 2. To some extent the area is effectively a conservation area already.

The concept of the preserved fields was developed by a working group coordinated by the Walgett Shire Council in the mid 1990s. The working group sought public and government stakeholders' comments on what standards of rehabilitation should be applied to opal fields in the Lightning Ridge area. On behalf of the community, Walgett Shire Council recommended to the Department of Mineral Resources (now Department of Primary Industries) that certain areas be designated as "preserved" opal fields. The intention was that their moonscape appearance should be maintained for heritage and social reasons.

During July and September 2007 the Walgett Shire Growth Management Study and Draft Strategy was placed on public exhibition. On page 163 of that document there is a recommendation that Council establish a "special activities" zone for opal mining over those parts of the 'preserved' opal fields "that are flood free and have been subject to significant historical mining activity". The boundaries of the heritage conservation area should be the same as those of the proposed special activities" zone for opal mining.

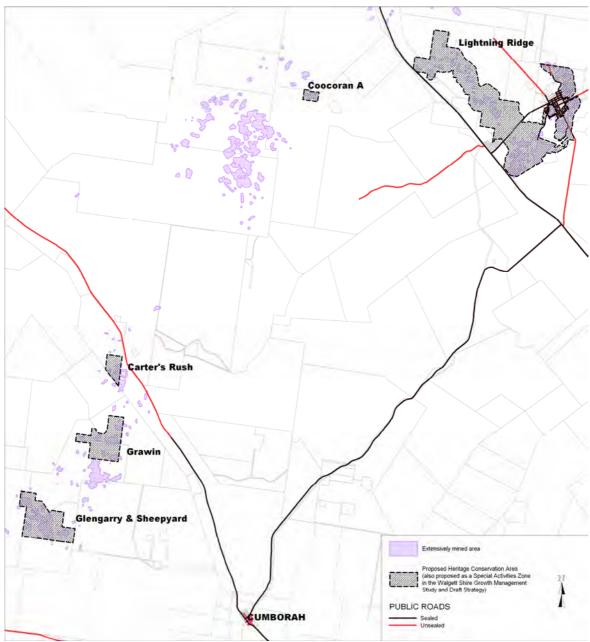

Figure 2 - Proposed Heritage Conservation Area.

#### 4.12 Potential items destroyed

The following items were under consideration, but were destroyed during the course of the Study:

- Catholic Church, Walgett (destroyed by fire)
- Shop (Outback Country Kitchen), Lightning Ridge (destroyed by fire)
- Diggers' Rest Hotel, Lightning Ridge (destroyed by fire)
- Former Post Office, Carinda (demolished following irreparable vandalism)
- Former Post Office, Cumborah (collapsed following structural failure)
- Dangar Bridge over the Barwon River, Walgett

- Station Master's House, Walgett (demolished)
- Molyneux House, Harlequin St., Lightning Ridge (demolished)
- House, Fox St, Walgett (destroyed by fire)

#### 4.13 Items for further study

Further investigation of the below items is recommended:

- Blue hole fish trap, No. 1 paddock, Angledool station, Angledool
- Bugilbone siding, Bugilbone
- Bungle Gully Dam, Baradine Creek
- Cuddie Springs archaeological and palaeontological site
- Cumborah mound springs, Cumborah
- Cumborah Quarry, Cumborah
- Former Grawin Inn (cellar, graves), Grawin
- Major Mitchell's camp site, near bridge, Angledool
- Nebea tank, Walgett-Carinda Road
- Pumping stations, Namoi River
- Water filtration plant, Walgett
- Scout Hall (former Walgett fire station), Pitt and Dewhurst Streets, Walgett
- Survey marks on trees along river, Angledool
- Swinging bridge, Bungle Gully Creek, Come-by-Chance
- W. G. Colless Stand, Walgett Racecourse, Walgett
- Yarrim shipwreck, Barwon River
- Walgett Railway Station Building
- End of railway line, Pokatoroo
- Manual phone exchange, old Walgett Post Office

#### 4.14 Moveable items

Moveable items can be considered part of the Shire's environmental heritage. Several such items and collections were identified, but do not require statutory protection in the Local Environmental Plan. They include:

- The Rumbler, Lightning Ridge
- The Big Hoist, Lightning Ridge
- The old wool cart, Lightning Ridge
- Contents of the Lightning Ridge Historical Society Museum
- Contents of the Goondee Keeping Place, Lightning Ridge
- Contents of the Walgett and District Historical Society Museum

#### 4.15 Outcomes of the Study

While in progress the Study has made an important contribution to the wider objectives of the heritage program. The various public and Committee meetings, newspaper articles and communications with owners of potential items have all served to widen an appreciation of heritage concepts and the heritage system. Many of the items identified have benefited from grants from the Local Heritage Fund, which assists owners with practical conservation work.

#### 5 THE CULTURAL HERITAGE OF WALGETT SHIRE

# 5.1 How the geology, geography, history and demography of Walgett Shire have shaped its environmental heritage

The Thematic History begins with a description of the geology, geography and climate of the Shire. It shows in considerable detail how they have strongly influenced its historical evolution, and how human activity, both before and after European settlement, has changed the landscape.

History relies on three kinds of evidence: written, oral and physical. Much of the physical evidence of the shire's early history, especially buildings and other structures, has been lost. Fragile early buildings, such as slab huts, were never intended to last. More permanent timber buildings, such as substantial hotels in Walgett, and much of Wilson Street, Collarenebri, have been lost to fire. The reactive soils which on which agriculture relies provide poor foundations, especially for brick buildings, many of which have been lost to structural damage.

In the cities of Australia, economic development and in increasing scarcity of land lead to denser and denser development, so that older buildings and landscapes are under pressure for redevelopment. Economic pressure on historic buildings and structures operates differently in areas like Walgett Shire. Here the major factor is the lack of continuing economic use for many types of buildings. Mechanisation, modern transport and the general drift of population from isolated properties to villages, and thence to towns, and to the major cities, have left farm buildings, homesteads, shops, houses and churches, and in the past, entire villages, without an ongoing economic use. Lack of use leads inevitably to a lack of maintenance, and ultimately the loss of the item.

Where there is a continuing use, whether in the city of in rural areas, buildings in particular are frequently altered. For example, many early weatherboard and even earlier solid timber slab houses have been encapsulated in fibrous cement sheeting, their verandas have been enclosed, and aluminium windows substituted for timber. As a result their historical value is obscured.

These losses make the Shire's remaining heritage all the more precious, and the Study has revealed a surprising variety of valuable items in the towns, villages and rural areas across the whole Shire. Some are so old that they cannot be dated. As is the case across rural Australia, homesteads and outbuildings reveal early life on the land, while churches, houses, shops, hotels and halls reflect the growth of towns and villages. Other items are particularly characteristic of the region and Walgett Shire in particular: tanks (reservoirs), bore baths, and levee banks show how water has been manipulated, while miners' huts, mine sites and the entire landscape of the Preserved Fields continue to tell the story of opal mining.

#### 5.2 Distribution of types of item across the Shire

The tables below show how the various types of items are distributed. The number of items recommended for listing is comparable with those identified by recent studies in other shires in the region.

Table 1: Items in each Location

#### **6 RECOMMENDATIONS**

The Study Committee recommends that Council

- 1. List the items identified by the Heritage Study as items of environmental heritage in a schedule to the Local Environmental Plan.
- 2. List the Preserved Opal Fields as a heritage conservation area in the Local Environmental Plan.
- 3. Further investigate items identified, but not assessed, in section 4.13 of the Heritage Study as "*Items for further study*".
- 4. Consult with the Aboriginal community and undertake a study of Aboriginal heritage in the Shire.

# **APPENDICES**

#### 8 APPENDIX A: Register of the National Estate

Items that are listed in the Register of the National Estate are summarised in the table below.

Table: Items included in the Register of the National Estate.

ITEM	LOCATION	STATUS
Angledool Aboriginal Reserve and Cemetery	New Angledool	Registered
Collarenebri Aboriginal Cemetery	Collarenebri	Registered
Cuddie Springs Palaeontological Site	Carinda	Indicative Place
Indigenous Place	Barokaville Station via Walgett	Indicative Place
Indigenous Place	Brewarrina (partly in Walgett Shire)	Registered
Indigenous Place	Gingie Station via Walgett	Indicative Place
Indigenous Place	Walgett	Registered
Lightning Ridge Hot Artesian Bore Baths Pandora St	Lightning Ridge	Indicative Place
Narran Lakes Area	Brewarrina (partly in Walgett Shire)	Registered
Nettleton's Shaft	Lightning Ridge	Registered
Two Mile Creek Rail Bridge	Walgett	Registered
Walgett Courthouse 55 Wee Waa St	Walgett	Registered
Walgett Shire Council Chambers (former) 78 Fox St	Walgett	Indicative Place

**Indicative:** Data provided to or obtained by the Australian Heritage Council or the former Australian Heritage Commission has been entered into the database and the place is at some stage in the assessment process. A decision on whether the place should be entered in the Register has not been made.

**Registered:** The place is in the Register of the National Estate. Although some places may be legally registered because they are within a larger registered area they may not necessarily possess intrinsic significance.

# 9 APPENDIX B: Items on the Register of the National Trust of Australia

- General Cemetery, Gem Street, Lightning Ridge.
- Former Council Chambers, Fox Street, Walgett.
- Former Mercadool Inn.
- Lone grave, Capal.
- Old Burren graves.
- Walgett Court House.

#### 10 APPENDIX C: Process summary

The points below summarise the typical process used to undertake a community based heritage study:

- 1. Council appoints a coordinator.
- 2. Council advises the community about the proposed study and calls for expressions of interest for a heritage study committee, both by advertisement and direct invitation to interested organisations and individuals.
- 3. The committee holds a workshop with interested members of the community to decide on the scope and direction of the study.
- 4. The coordinator arranges for a thematic history to be undertaken.
- 5. The thematic history is undertaken by a professional historian. Where local expertise is available, the historian will use a team of local historians in preparing the history.
- 6. The committee develops a computerised list of items already identified, e.g. those identified in the National Trust Register and other respected community lists.
- 7. The committee cross-checks the known items against the draft thematic history to find obvious gaps.
- 8. The committee calls for community assistance to complete the necessary information and to fill known gaps.
- 9. The coordinator and committee may hold workshops at this point to assist the community to nominate items and offer further information on identified items.
- 10. The historian revises the thematic history in the light of community input and comments on the histories of individual items.
- 11. The coordinator supports the committee in the completion of assessments and inventory sheets for identified items.
- 12. The coordinator works with the committee to draw up a list of management recommendations.
- 13. The draft inventory and recommendations are checked with the community through meetings, displays in shopping centre's, articles in the local newspaper, etc.
- 14. Additional community information and advice is included in the final inventory and recommendations.
- 15. The committee identifies levels of significance (local or State) for each item with the assistance of the coordinator and the historian.
- 16. The coordinator sends the full inventory to the Heritage Office for entry into the State Heritage Inventory.
- 17. The committee presents the completed study and management recommendations and evidence of community acceptance to the council for adoption.
- 18. Council adopts the study and commences implementation, including LEP listings, promotion and incentives.

ITEM DETAILS	
Name of Item	Old Shire Chambers
Other/group name	Walgett Historical Museum
Location	Fox Street, Walgett 2832
Property description	Lot 45 DP 253643
Item type	Built
Item group	Government and administration
Category	Council chambers
Owner	Local government
Current use	Historical museum and Historical Society office.
Former use	Shire chambers and council offices
Statement of	The original council chambers and administrative headquarters of Walgett Shire, a rare example of
significance	a Federation free style public building constructed of solid concrete.
DESCRIPTION	
Designer	J. P. French, Shire Engineer
Builder/ maker	
Physical Description	Single storey symmetrical Federation free style civic building with recessed entry porch flanked by Corinthian columns. Complex roof of corrugated iron, with three gables facing the street. Solid concrete walls, roughcast rendered externally and lined internally with Wunderlich pressed metal, also used to line ceilings. Interior contains the council chamber and several offices.
Physical condition	Some cracking in walls due to movement in reactive soil foundation.
Construction years	Start year 1913 Finish year 1913
Modifications and dates	At rear (west side), attached toilets, and possibly a full width veranda which had been enclosed, were subsequently demolished. Timber framed, fibro clad extension added on south side.
HISTORY	
Historical notes	Walgett was laid out and proclaimed, the first allotments were sold, and a post office and police station established, all in 1859-60. A store and hotel soon followed, but development was slow and transport and communications were poor . By 1874 the town had 18 streets, but only a few houses and no school or church. It began to boom with an influx of pastoral capital in 1876. The 1901 census recorded 779 people and 137 dwellings in the town. The establishment of a rail connection in 1908 and a return of good seasons fostered a building boom and from 1905 to 1910, the number of businesses in the town jumped from under 50 to nearly 100. In 1906, when Walgett became the shire headquarters, most of the commercial development was in Fox Street between Warrena and Wee Waa Streets and eastwards along Wee Waa Street. Housing was largely confined to Warrena, Namoi, Wee Waa, and Peel Streets, with cottages scattered about the rest of the township. The Shire Chambers was built in 1913, and was leased to the Walgett and District Historical Society when the new shire offices were completed in 1974.
National theme	Governing
State theme	Government and administration
Local theme	Evolving community – extending government and bureaucracy
Further comments	Original drawing, amended to show alterations, is on display in the building.

ITEM DETAILS	
Name of Item	Coaching Stables
Other/group name	Occurring Calcino
Location	"Milchomi" 17 km from Come-by-Chance, on Pilliga Road
	Come-by-Chance 2832
Property description	Lot 22 DP 750293
Item type	Built
Item group	Transport - Land
Category	Stage coach stables
Owner	Private
Current use	Vacant
Former use	Change station for horse-drawn coaches: stables with sleeping accommodation for drivers above.
Statement of significance	The coaching stables at "Milchomi" has historical significance as a rare example of a stables building that (together with the adjacent inn and blacksmith's shop, both now demolished) served a horse-drawn passenger and mail coach service operated by a local firm, Nowland Brothers. It has aesthetic significance as a rare two-storey stables building of post, beam and plank construction constructed of local cypress pine. It is highly regarded in the Shire. The adjacent site of the former blacksmith's shop has archaeological potential.
DESCRIPTION	
Designer	
Builder/ maker	
Physical Description	Two storey gable roofed building 11 m long and 6.2 m wide, with single storey skillion-roofed section 11 m long and 4.1 m wide on western side. Corrugated galvanised iron roofing, unpainted.
	Frame and walling of timber, generally cypress pine which is native to the area. Round poles at each corner extend the full height of the two-storey section. Timber beams span between these poles in both directions, with 150 x 150 mm floor joists at 700 mm centres supporting rough wide floor planks. Internal and external walls comprise 125 x 75 mm studs at 1000 mm centres, with horizontal planks fitted between them and held in place by beading fixed to studs.
	There is no bracing except from the sections of plank between the studs. Posts appear never to have extended more than 300 mm into the ground, which consequently do not act as vertical cantilevers. Some studs bear on bottom plates bearing directly on the ground, while others appear to extend a short distance into the ground.
	Roof battens supported on round rafters with a few horizontal members. Gable ends and skillion wall lined with weatherboards. Ground floor paved with short pieces of cypress trunks set into earth. No evidence of stairs. Double doors on north side enable hay to be loaded into upper floor. Ridge beam projects beyond northem gable to support hoist. Traces of Indian red paint on external boards.
Physical condition	Weathered. One sheet of roofing missing. As at mid 2005, temporarily braced with steel space frames, rods and cables, leaving building plumb and square, with structural joints reconnected, but many post bases rotted out.
Construction years	Start year Finish year
Modifications and dates	Some openings partially covered with galvanised iron sheeting. No other modifications evident
HISTORY Historical notes	The stables and former inn and blacksmith's shop are popularly described as a Cobb and Co. change station. Cobb and Co. did operate services to Walgett from 1877, but the complex at "Milchomi" served a local operator, Nowland Brothers, who had mail and passenger runs west of the Namoi River. This firm was one of many smaller businesses following the Cobb and Co. method of fast horse-drawn coaches with inns and stables where teams of horses could be changed.

	This stop at "Milchomi" was the first on the run between Narrabri and Walgett. Subsequent stops		
	included Come-by-Chance, Evandale and Goangra.		
	Induded Come-by-Chance, Evandale and Coangra.		
	The coaches used by the operators may have been built in the area. There was a coachbuilder at		
	Collarenebri in the late 19th century.

HISTORY			
Historical notes	Walgett was laid out and proclaimed, the first allotments were sold, and a post office and police station established, all in 1859-60. A store and hotel soon followed, but development was slow and transport and communications were poor. By 1874 the town had 18 streets, but only a few houses and no school or church. It began to boom with an influx of pastoral capital in 1876.  A Court of Petty Sessions commenced at Walgett on 9 August 1860. The District Court began at Walgett some years later. A new brick court house was being erected in Walgett in 1876-7 using locally burned bricks. By 1881, a number of public buildings were completed in Walgett including the Court House, Police Station and Post Office.  The 1901 census recorded 779 people and 137 dwellings in the town. The establishment of a rail		
	connection in 1908 and a return of good seasons fostered a building boom and from 1905 to 1910, the number of businesses in the town jumped from under 50 to nearly 100. In 1906, when Walgett became the shire headquarters, most of the commercial development was in Fox Street between Warrena and Wee Waa Streets and eastwards along Wee Waa Street. Housing was largely confined to Warrena, Namoi, Wee Waa, and Peel Streets, with cottages scattered about the rest of the township.		
National theme	Governing		
State theme	Law and order		
Local theme	Evolving community – extending government and bureaucracy		
Further comments	The post office and court house are wo of the oldest public buildings in Walgett. Only a handful of public and commercial buildings survive from the late 19th and early 20th century. Timber buildings often succumbed to fire, while brick was subject to excessive foundation movement caused by reactive soils.

Former use	Surveyor's mark
Statement of	Historically significant survey mark, established and precisely located using astronomical
significance	observations by surveyor Dewhurst when laying out the town of Walgett in 1859.
DESCRIPTION	
Designer	
Builder/ maker	Arthur Dewhurst, Surveyor
Physical Description	A sharpened timber post about 1m high, set in a circular brick base about 1 m in diameter, constructed of cement rendered sandstock bricks.
Physical condition	
Construction years	Start year 1859 Finish year
Modifications and dates	Post missing; reinstated 2004
mounications and dates	T oct mooning, romotated 200 i
HISTORY	
Historical notes	In October 1859, acting upon the official instructions of the Surveyor-General, surveyor Arthur Dewhurst from Tamworth surveyed a town site where Walgett was to be established. In accordance with standard practice, he laid out a grid pattern of streets, with sites set aside for Public Recreation, Public Buildings, a market and churches.  Dewhurst established the exact position of the survey mark by astronomical observations.

Modifications and dates			
HISTORY			
	The Collarenebri branch never reached beyond Pokataroo. The train finally steamed into Walgett on 7 November 1908. The rail connection fostered a building boom in the town. The first rail motor arrived on 2 December 1924. The date of the goods shed is not known but it existed in the 1930s.  Train services sustained the town and district for many years, but the route was long and circuitous, and by the 1950s, motor transport and an aerial service were available, and rail services grew ever slower and more unreliable. The abandonment of railway passenger services was announced in 1974 and the last passenger train ran in December 1983. The freight service was discontinued at the same		
National theme	time and the goods shed was no longer used. The line is now used only for the bulk transport of wheat. Economy

Modifications and dates	Extensions at rear		
HISTORY			
	sprang up at points along the routes. For three years, until the line reached Walgett in 1908, Cryon was the terminus. The subject building was erected there to cater for travellers changing from one mode of transport to another. It was completed early in 1906 and had eleven rooms. In time, the settlement had a hotel, general store, fruit shop, post office, school and railway buildings. It was known as far as Queensland as the main shipping point for cattle to Sydney markets. After a severe wind storm on the evening of 7 October 1911, there was a flurry of activity as repairs were made to the buildings of the village, but the railway goods shed was not replaced. The subject accommodation house and the hall are all that now survives of the hamlet.

	area., excavated using horse-drawn implements.		
DESCRIPTION			
Designer			
Builder/ maker	Fred Dowdle, tank sinker, contractor to NSW Government.		
Physical Description	Large open reservoir bounded by earth banks		
Physical condition	Good		
Construction years	Start year 1907 Finish year 1908		
Modifications and dates			
HISTORY Historical notes	Opal was discovered at Lightning Ridge in the 1880s. Prospecting and mining was begun in 1901-		
National thoma	Sims Hill, and a small settlement had sprung up near the tank at Wallangulla Station. There were two streets with 23 timber buildings and a similar number of tents by 1906. Sanitation was a problem, and in 1908 surveyor A.W. Mullen laid out the New Town, bounded by Kopi, Gem, Harlequin and Onyx Streets.  Fred Dowdle was contracted to build the tank to provide water for the town. He worked for 14 weeks, losing five Clydesdale horses, and stopped two weeks before the expected completion of the job as he had no more feed for his horses. The tank filled rapidly and was never finished to the planned size.  There was some resistance to moving to the New Town, but between 1910 and 1912 most of the settlement had done so. Most commercial and service buildings were erected in Morilla Street.  Jack Donnelley had the lease on the tank in 1910. George Darby, who ran a dairy nearby, may have been the caretaker. Water sold at first for a penny a bucket, and later for 6d. per 100 gallons. Molly, daughter of the owner of Vauses' store in Morilla Street, would gather lilies from the tank c. 1916.

ITEM DETAILS			
Name of Item	Well		
Other/group name			
Location	Gray Park		
	Walgett 2832		
Property description	Lot 7 DP 759036		
Item type	Built		
Item group	Utilities - Water		
Category	Well		
Owner	Local Government		
Current use	Not used		
Former use	Supply of water to Walgett Gool		
Statement of significance	Well or cistern constructed to supply water to Walgett Gaol, built in or before 1886, and the only element remaining after the Gaol's demolition in 1954. It demonstrates the reliance of public		
· ·	institutions on ground water for domestic use until reticulated artesian water became available.		
DESCRIPTION			
Designer Designer			
Builder/ maker	Well or underground sistem leasted in what is now Con. Body Imparities desired for both there		
Physical Description	Well or underground cistern located in what is now Gray Park. Irregular domed top just above ground level of sandstock bricks with some cement mortar and concrete adhering. An opening about 5 450 mm diameter now has a welded mesh grating.		
Physical condition			
Construction years	Start year 1881 Finish year		
Modifications and dates			
HISTORY			
Historical notes	A plaque on the well states that it was constructed in 1881 to provide water to the gaol, constructed at the same time. Kass's history states that the gaol was built in 1886 to replace an earlier one. The gaol was demolished and the site cleared in 1954, and Gray Park was subsequently established.

Owner	Local Government		
Current use			
Former use	Mine Shaft		
Statement of	One of the earliest mine shafts in Lightning Ridge, sunk by Charles Nettleton who by successfully		
significance	selling the newly discovered black opals was instrumental in the development of the opal industry. The shaft demonstrates the primitive and arduous manual methods used by the early miners.		
DESCRIPTION			
Designer			
Builder/ maker	Charles Nettleton		
Physical Description	Hand-cut mine shaft		
Physical condition			
Construction years	Start year 1902 Finish year 1903		
Modifications and dates	Monument nearby		
HISTORY			
	White Cliffs, the importance of the discovery was not realized. About 1901 or 1902, local boundary rider, Jack Murray put down a shaft at Lightning Ridge. He was soon joined by Charles Nettleton, a miner from Bathurst and White Cliffs. His first shaft in 1902 was unsuccessful, and in 1903 he joined Murray and others at Nobby's field. Thus Nettleton did not discover the field and was not the first miner. His importance was his tenacity and success in finding a market for the strange new black opal which was to become Australia's national gemstone. Nettleton's success in selling the opals he found attracted attention to the field. Knowledge of the discovery of opals locally was apparent by mid 1903 when local mining warden, T A Ridley, visited the area. He found 18 men prospecting, and a number of shafts, one of them 25 feet deep, took samples and reported to head office. In 1905, the first rush for opals focused on Sims Hill at the highest elevation in the area. A settlement called Wallangulla formed nearby close to Wallangulla Tank in Bundinbarrina Station.  Early mining methods were of course, the simplest and most arduous: pick and shovel, windlass and leather bucket. In the days before mechanical processing, mullock was left on the surface, and the entire Three Mile was covered in enormous heaps of top dirt. Working by candlelight and often rejecting or ignoring the blue-green stones, the old-timers missed a great deal of opal.		
National theme	Nettleton's first shaft was designated as historical reserve in 1981  Economy		
State theme	Mining		
Local theme	Settling upon / managing the land - extracting wealth from the earth

HISTORY				
	The line advanced in fits and starts, with hamlets forming at the temporary terminus, to disappear later. The Collarenebri branch never reached beyond Pokataroo. The train finally steamed into Walgett on 7 November 1908. The rail connection fostered a building boom in the town. The first rail motor arrived on 2 December 1924. The date of the weighbridge is not known.  Train services sustained the town and district for many years, but the route was long and circuitous, and by the 1950s, motor transport and an aerial service were available, and rail services grew ever slower and more unreliable. The abandonment of railway passenger services was announced in 1974 and the last passenger train ran in December 1983. The freight service was discontinued at the same time and the weighbridge was no longer used. The line is now used only for the bulk transport of wheat.

Former use			
Statement of	Rare example of an elevated Queensland-type weatherboard school building, in continues use		
significance	since the early 20th century.		
DESCRIPTION			
Designer			
Builder/ maker			
Physical Description	Large weatherboard classroom block, floor elevated on piers with shelter and amenities space below. Corrugated steel hipped roof extends over wide verandas on all sides.		
Physical condition	Excellent		
Construction years	Start year 1908-12 Finish year		
Modifications and dates	Timber piers replaced with steel, area under building concreted 1963		
HISTORY			
Historical notes	The first school house at Collarenebri opened in 1885. A larger weatherboard building was erected in 1894, and the original one was used as a weather shed. By 1908 plans for the subject elevated building had been drawn, and by 1910 it had been built. The 1894 building was relocated to a site in Church Street in 1912. Like traditional Queensland buildings, the new school block was elevated, to provide shade and shelter below, and to keep the floor above flood level.

HISTORY		
National theme State theme	Burren Junction where the railway line branched to serve Collarenebri and Walgett was proclaimed as a village in 1903. A major sale of Crown allotments in the village was held in 1910. A town emerged with banks, school and a thriving commercial life, serving the surrounding area in which the large pastoral holdings had been cut into smaller holdings creating a denser population than before. It later became a major centre where livestock were loaded onto trains for shipment to saleyards. William Houlahan had converted some of his Conditional Lease, between the village and the main road, into a Conditional Purchase and obtained a grant of that land in 1921. A good deal of the village developed on this land, which was formally subdivided in 1928.  Settlement  Accommodation (Housing)	
Local theme	Housing the people - housing citizens	
Further comments	A good proportion of houses remain in Buren Junction from theFederation and inter-war periods, but only a few are reasonably intact: most are encased in fibro, verandas are enclosed, and windows are aluminium.

HISTORY Historical notes			
	The growth of pastoral holdings in the mid 19th century inspired the reservation of Travelling Stock Routes across the shire. They usually followed the rivers or ran between bores or tanks, and converged on major centres such as Walgett and Collarenebri. Along the stock routes inns were established, usually on land leased from the Crown. Small settlements grew on the stock routes, often around the inns. These were mainly for the comfort of families travelling by horse and buggy between outlying properties and towns and villages for provisions. They were not specifically for the drovers, who would socialise at the inn but camp with the stock and horses overnight. Later, Cobb and Co. and local operators began mail and passenger runs using fast horse-drawn coaches with inns and stables where teams of horses could be changed.  The subject house, evidently built as an inn and reputedly used by Cobb and Co., pre-dates the proclamation of Burren Junction as a village in 1903 and the major sale of Crown allotments in 1910 from which a town emerged with banks, school and a thriving commercial life, serving the surrounding area in which the large pastoral holdings had been cut into smaller holdings creating a denser population than before. It is not known when the inn became a private house. It was vacant for many years and was acquired for restoration in 2007.

Historical notes  Burren Junction where the railway line branched to serve Collarenebri and Walgett was proclaimed as a village in 1903. A major sale of Crown allotments in the village was held in 1910. A town emerged with banks, school and a thriving commercial life, serving the surrounding area in which the large pastoral holdings had been cut into smaller holdings creating a denser population than before. It later became a major centre where livestock were loaded onto trains for shipment to saleyards. William Houlahan had converted some of his Conditional Lease, between the village and the main road, into a Conditional Purchase and obtained a grant of that land in 1921. A good deal of the village developed on this land, which was formally subdivided in 1928.  National theme  Settlement  Settlement  Accommodation (Housing)  Housing the people - housing citizens  Further comments  A good proportion of houses remain in Burren Junction from theFederation and inter-war periods, but only a few are reasonably intact: most are encased in fibro, verandas are enclosed, and windows are aluminium. Item group	Residential buildings (private)
Category	House
Owner	Private - Individual
Current use	Residence
Former use	
Statement of	Rare example of a largely intact vernacular weatherboard bungalow built for the Shire Clerk during
significance	Walgett's early period of growth in theFederation period.
DESCRIPTION	
Designer	
Builder/ maker	
Physical Description	Federation weatherboard bungalow with hipped main corrugated iron roof, projecting gabled bay, and bellcast roof to veranda.
Physical condition	Good
Construction years	Start year 1900 (est.) Finish year
Modifications and dates	Insect screening to front veranda .evaporative cooler on roof.
HISTORY	
Historical notes	The house was built for the Shire Clerk.  Walgett was laid out and proclaimed, the first allotments were sold, and a post office and police
National theme	station established, all in 1859-60. A store and hotel soon followed, but development was slow and transport and communications were poor . By 1874 the town had 18 streets, but only a few houses and no school or church. It began to boom with an influx of pastoral capital in 1876. The 1901 census recorded 779 people and 137 dwellings in the town. The establishment of a rail connection in 1908 and a return of good seasons fostered a building boom and from 1905 to 1910, the number of businesses in the town jumped from under 50 to nearly 100. In 1906, when Walgett became the shire headquarters, most of the commercial development was in Fox Street between Warrena and Wee Waa Streets and eastwards along Wee Waa Street. Housing was largely confined to Warrena, Namoi, Wee Waa, and Peel Streets, with cottages scattered about the rest of the township.  By 1943, it had grown. While the commercial and administrative areas were much the same, the residential part had expanded considerably, to an area bounded by Montkeila, Pitt, Warrena, Namoi, Arthur, Duff, Euroka and Peel Streets. The number of buildings in the shire had only grown by 100 between the 1911 and 1947 censuses, but much of the development took place in the town itself.  Settlement
State theme	Accommodation (Housing)
Local theme	Housing the people - housing citizens
Further comments	Only a handful of public and commercial buildings survive in Walgett from the late 19th and early 20th
Further confinents	century. A good proportion houses remain, but only a few are reasonably intact: most are encased in fibro, verandas are enclosed, and widows are aluminium.

Housing was largely confined to Warrena, Namoi, Wee Waa, and Peel Streets, with cottages scattered about the rest of the township.  By 1943, it had grown. While the commercial and administrative areas were much the same, the residential part had expanded considerably, to an area bounded by Montkeila, Pitt, Warrena, Namoi, Arthur, Duff, Euroka and Peel Streets. The number of buildings in the shire had only grown by 100 between the 1911 and 1947 censuses, but much of the development took place in the town itself.
National theme	Settlement
State theme	Accommodation (Housing)
Local theme	Housing the people - housing citizens
Further comments	Only a handful of public and commercial buildings survive in Walgett from the late 19th and early 20th century. A good proportion of the houses remain, but only a few are reasonably intact: most are encased in fibro, verandas are enclosed, and widows are aluminium.

Statement of	Reputedly the oldest house in Walgett, a rare example of a framed timber slab cottage of the type
significance	coomonly built in the decades following the establishment of Walgett in 1860.
DESCRIPTION	
Designer	
Builder/ maker	
Physical Description	Cottage with walls of vertical timber slabs set in frames, corrugated iron gable roof, and front
	veranda. Similar gable roofed section at rear, with weatherboard walls.
Physical condition	Poor
Construction years	Start year Finish year
Modifications and dates	Rear section probably added, perhaps as early as the late 19th century
HISTORY Historical notes	Walgett was laid out and proclaimed, the first allotments were sold, and a post office and police
	station established, all in 1859-60. A store and hotel soon followed, but development was slow and transport and communications were poor . By 1874 the town had 18 streets, but only a few houses and no school or church. It began to boom with an influx of pastoral capital in 1876. The 1901 census recorded 779 people and 137 dwellings in the town. The establishment of a rail connection in 1908 and a return of good seasons fostered a building boom and from 1905 to 1910, the number of businesses in the town jumped from under 50 to nearly 100. In 1906, when Walgett became the shire headquarters, most of the commercial development was in Fox Street between Warrena and Wee Waa Streets and eastwards along Wee Waa Street. Housing was largely confined to Warrena, Namoi, Wee Waa, and Peel Streets, with cottages scattered about the rest of the township.  By 1943, it had grown. While the commercial and administrative areas were much the same, the residential part had expanded considerably, to an area bounded by Montkeila, Pitt, Warrena, Namoi, Arthur, Duff, Euroka and Peel Streets. The number of buildings in the shire had only grown by 100 between the 1911 and 1947 censuses, but much of the development took place in the town itself.
National theme	Settlement
State theme	Accommodation (Housing)
Local theme	Housing the people - housing citizens
Further comments	Reputedly the oldest house in Walgett. Slab construction was typical of early remote settlements, before stud framing became common and milled weatherboards more readily available in Federation times. No other slab cottage is known to survive in the town.

Statement of	Good example of a weatherboard bungalow demonstrating the gradual growth of Collarenebri	
significance	between the wars.	
DESCRIPTION		
Designer		
Builder/ maker		
Physical Description	Inter-war weatherboard bungalow with hipped main corrugated iron roof continuing over veranda. Asymmetrical plan, with differently sized projecting gabled bays on each side, one containing a faceted bay window, and a veranda on one side of the house.	
Physical condition	Good	
Construction years	Start year Finish year	
Modifications and dates	Sliding window in minor projecting bay. Front veranda insect screened, side veranda enclosed. Evaporative cooler on roof.	
HISTORY		
Historical notes	Collarenebri emerged along a site where tracks converged to cross the Barwon River. Stockyards and a few huts were positioned both in and near the new village. Before 1866, Edward Fletcher and Mr Smith made a Conditional Purchase of 40 acres on the eastern side of the Barwon River. Fletcher commenced a store on this land. In 1867, Collarenebri was measured out as a town and proclaimed. It had a store, post office and a punt to aid river crossings  Collarenebri grew very slowly until the 1880s. A police station was established in 1882, a Court of Petty Sessions in 1884, and a public school in 1885. The Gladstone Bridge opened in 1886, confirming the role of the town in the district. By 1886, there was Brasen's Royal Hotel in Wilson and	
	Walgett Streets, his store in Walgett Street and a cordial factory. Collarenebri in 1891 had 127 people occupying 24 dwellings.  In 1900, Collarenebri had five stores, two hotels, a butcher, a baker, two blacksmiths, a doctor and its own newspaper. The opening up of 50,000 acres nearby for selection in 1897 had a stimulating effect on the town. By 1900, storekeeper W H Wordsworth claimed that since the land was subdivided in the early 1890s, trade had increased ten times.

Construction years	Start year Est 1890 Finish year	
Modifications and dates	Gables sheeted with b fibro or fibre cement.	
HISTORY		
Historical notes  National theme	George and William Colless took up a remnant piece of land ignored by other squatters about 1862 calling it Come By Chance. The village, one of the few to be privately established, later emerged on part of this station. The land on which the village it stood was granted to William Colless in 1869.  By 1888, there was a hotel in the village and Arthur Colless applied for a post office. The postal inspector was opposed to creating an official post office, but he observed, "Mr Colless is a very enterprising liberal gentleman" and proposed an arrangement with him. A post office commenced at Come-By-Chance in December 1890. A branch of the Government Savings Bank opened at the post office in 1895. Come-By-Chance remained a small privately owned village. However, the family later sold parts of the village, such as the store. When Arthur Colless died in 1921, he still owned the village, which consisted of a post office conducted by Thomas McGee, a police station conducted in one of his cottages, the Come-By-Chance hotel plus another cottage. Ten years later, when the village was again being valued after the death of William Arthur Colless, the village was described as "a few old houses and a store" and land there as "practically valueless."

Former use		
Statement of	Excellent example of a large weatherboard and galvanised iron community hall, given to the people	
significance	of the Come-by-Chance district in 1895 by the owner of the village, a focus of community life for many years and of continuing social significance.	
DESCRIPTION		
Designer		
Builder/ maker	Arthur Colless	
Physical Description	Large single-storey weatherboard building with galvanised iron roof. Two linked sections comprise main hall with porch at each end and lean-to side room; and smaller supper room.	
Physical condition	Good	
Construction years	Start year 1895	
Modifications and dates	Aluminium windows 1988.	
HISTORY		
Historical notes	George and William Colless took up a remnant piece of land ignored by other squatters about 1862 calling it Come By Chance. The village, one of the few to be privately established, later emerged on part of this station. The land on which the village it stood was granted to William Colless in 1869.  By 1888, there was a hotel in the village and Arthur Colless applied for a post office. The postal inspector was opposed to creating an official post office, but he observed, "Mr Colless is a very enterprising liberal gentleman" and proposed an arrangement with him. A post office commenced at Come-By-Chance in December 1890. A branch of the Government Savings Bank opened at the post office in 1895. Come-By-Chance remained a small privately owned village. However, the family later sold parts of the village, such as the store. When Arthur Colless died in 1921, he still owned the village, which consisted of a post office conducted by Thomas McGee, a police station conducted in one of his cottages, the Come-By-Chance hotel plus another cottage. Ten years later, when the village was again being valued after the death of William Arthur Colless, the village was described as "a few old houses and a store" and land there as "practically valueless."	
National theme	Culture	
State theme	Social institutions	
Local theme	Evolving community - uniting for a common cause	
Further comments	The hall was given to the people of Come-by-Chance by its owner and builder, Arthur Colless, on 14 January 1895. It is administered by a community trust whose secretary in 2006 was his great-granddaughter, Jane Keir.

Category	Post Office
Owner	Private
Current use	Office
Former use	Post Office and residence
Statement of	Victorian Georgian post office probably designed by James Bamet, completed 1881. One of the
significance	oldest public buildings in Walgett. Use of locally fired bricks is rare in the area.
DESCRIPTION	
Designer	James Barnet, Colonial Architect
Builder/ maker	
Physical Description	Large single –storey sandstock brick building with gabled roof, central projecting gabled bay, bellcast verandas with paired posts, semi-circular arches in red brick.
Physical condition	Good
Construction years	Start year Finish year 1881
Modifications and dates	Veranda partly enclosed. Extensions including telephone exchange on Wee Waa Street frontage
	obscure view of building. Fence and carport on Fox St further obscure view.
HISTORY	
N. C. LU	A postal service began at Walgett in 1851 close to where the Barwon could be forded. The town was laid out and proclaimed, the first allotments were sold, and a post office and police station established, all in 1859-60. A store and hotel soon followed, but development was slow and transport and communications were poor. By 1874 the town had 18 streets, but only a few houses and no school or church. It began to boom with an influx of pastoral capital in 1876. The subject post office was completed by 1881.  The 1901 census recorded 779 people and 137 dwellings in the town. The establishment of a rail connection in 1908 and a return of good seasons fostered a building boom and from 1905 to 1910, the number of businesses in the town jumped from under 50 to nearly 100. In 1906, when Walgett became the shire headquarters, most of the commercial development was in Fox Street between Warrena and Wee Waa Streets and eastwards along Wee Waa Street. Housing was largely confined to Warrena, Namoi, Wee Waa, and Peel Streets, with cottages scattered about the rest of the township. By 1943, it had grown. While the commercial and administrative areas were much the same, the residential part had expanded considerably.
National theme	Settlement Tours and villages (Tourshine)
State theme	Towns, suburbs and villages (Townships)
Local theme Further comments	Servicing the population - establishing community services
	The post office and court house are wo of the oldest public buildings in Walgett. Only a handful of public and commercial buildings survive from the late 19th and early 20th century. Timber buildings often succumbed to fire, while brick was subject to excessive foundation movement caused by reactive soils.

Physical Description	Row of nine narrow single-storey shops, four having parapets with curved tops and five having brick parapets with corbelled coping courses, between piers.
Physical condition	Good
Construction years	Start year Before 1906 Finish year
Modifications and dates	Modern shopfronts. Suspended bullnosed awning. Veranda posts removed probably after 1961.
HISTORY	
Historical notes	Walgett was laid out and proclaimed, the first allotments were sold, and a post office and police station established, all in 1859-60. A store and hotel soon followed, but development was slow and transport and communications were poor . By 1874 the town had 18 streets, but only a few houses and no school or church. It began to boom with an influx of pastoral capital in 1876. The 1901 census recorded 779 people and 137 dwellings in the town. The establishment of a rail connection in 1908 and a return of good seasons fostered a building boom and from 1905 to 1910, the number of businesses in the town jumped from under 50 to nearly 100. In 1906, when Walgett became the shire headquarters, most of the commercial development was in Fox Street between Warrena and Wee Waa Streets and eastwards along Wee Waa Street. Housing was largely confined to Warrena, Namoi, Wee Waa, and Peel Streets, with cottages scattered about the rest of the township.  By 1943, it had grown. While the commercial and administrative areas were much the same, the residential part had expanded considerably, to an area bounded by Montkeila, Pitt, Warrena, Namoi, Arthur, Duff, Euroka and Peel Streets. The number of buildings in the shire had only grown by 100 between the 1911 and 1947 censuses, but much of the development took place in the town itself.
National theme	Settlement
State theme	Towns, suburbs and villages (Townships)
Local theme	Servicing the population - supplying retail needs
Further comments	Only a handful of public and commercial buildings survive in Walgett from the late 19th and early 20th century. One factor has been obsolescence and development pressure. s well, brick buildings have suffered structural failure caused by reactive soils, while timber hotels and other buildings have been burnt down.

Other/group name	Bush Nursing Association Hospital
Location	Morilla Street
	Lightning Ridge 2834
Property description	Lot 17 DP 758612
Item type	Built
Item group	Health services
Category	Hospital
Owner	Individual - private
Current use	Museum
Former use	Hospital
Statement of	The first hospital and one of the oldest buildings in Lightning Ridge. Relocated but as a museum
significance	continues to demonstrate the characteristics and operation of an early 20th century bush hospital.
DESCRIPTION	
Designer	
Builder/ maker	Tom Urwin and Ronald McDonald
Physical Description	Small timber building with corrugated iron gabled and hipped roof. Very high ceilings. Verandas on three sides. Walls clad with cypress pine weatherboards above veranda roofs. Below verandas, interiors are lined with cypress boards and studs are exposed, a form of construction common in Queensland but unusual in NSW.
Physical condition	Excellent
Construction years	Start year 1914 Finish year 1914
Modifications and dates	Verandas enclosed, later removed. Building relocated and verandas reconstructed 1998.
HISTORY	
Historical notes	Opal was discovered at Lightning Ridge in the 1880s. Prospecting and mining was begun in 1901-02 by Jack Murray and Charles Nettleton. By 1905 a rush for opals was under way, focussed on Sims Hill, and a small settlement had sprung up near the tank at Wallangulla Station. There were two streets with 23 timber buildings and a similar number of tents by 1906. Sanitation was a problem, and in 1908 surveyor A.W. Mullen laid out the New Town, bounded by Kopi, Gem, Harlequin and Onyx Streets. There was some resistance to moving, but between 1910 and 1912 most of the settlement had done so. Most of the commercial and service buildings were erected in Morilla Street.  The cottage hospital was built in 1914 and was operated by the Bush Nursing Association. In 1955, a new hospital was built, and the cottage hospital was used as a private residence until 1996. It was relocated to the site of Spicer's Hut by the Lightning Ridge Historical Society in 1998. The verandas were reconstructed and the building restored as a museum, mostly demonstrating its original function as the cottage hospital.

ITEM DETAILS	
Name of Item	Lunatic Hill open cut opal mine
Other/group name	Three mile open cut opal (mine), Barclay's open cut (mine)
Location	Lightning Ridge 2834
Property description	Part Lot 1794 DP 767406
Item type	Area/Complex/Group
Item group	Mining and mineral processing
Category	Mine – Open Cut
Owner	Crown Land managed by the Department of Land and Water Conservation. Walgett Shire Council holds Permissive Occupancy 1985/19 (PO) over the area
Current use	
Former use	Opal mine
Statement of	The Lunatic Hill open cut opal mine has rare historical significance for the hand cut mine workings,
significance	dating from the earliest days of opal mining at Lightning Ridge, which pierce its sides; and for its association with miner and author lon Idriess, other Australian writers, and locally renowned early miners; rare aesthetic significance as an enormous part of a magnificent and unique man-made and natural landscape; social significance as a place highly valued by the miners and other residents of Lightning Ridge, and rare technical and research significance for what it can reveal about past opal mining practices and the geology of the area.
DESCRIPTION	
Designer	
Builder/ maker	
Physical Description	The mine consists of a clover-leaf shaped excavation about 250m long, 200m wide and 20m deep located in an opal mining area known as the Three Mile Field.
	A geological cross section of sequences from ground level to the opal workings is clearly visible from viewpoints behind the safety fencing. The sequences begin with Tertiary gravels on the surface overlying the hard shincracker (Coocoran claystones). The junction between these layers is strongly defined, as is the deeper point where the sandstone meets the Wallangulla claystone or Finch clay facies (opal dirt). These ancient, deeply-weathered layers are dazzlingly pale in the desert sun. There are often two or more horizons of opal dirt, to a depth of over 30 metres, the deeper lenses known as 'mud level'.
	Many features important to the formation and search for opal can be seen. These include particular colourations of the sandstone roof immediately overlying the opal clays, and the faults and slides where minor earth movements have caused discontinuities within the levels, influencing the distribution and deposition of silica solutions. These structures are often highlighted with iron oxide staining. Blows or verticals, where gas pressure has pushed its way to the surface, are also visible.
	Lightning Ridge is a palaeontological site of international scientific interest. Opalised fossils from this locality are formed by silica replacement of organic objects preserved in the opal claystones. In these astonishing specimens, we see a rare combination of two complex natural phenomena – fossilisation and opalisation. Most fossils are preserved in common opal or potch; some are transparent, with internal structures visible inside the bone. More rarely, specimens contain precious opal and these are surely among the most beautiful natural objects on earth. The opal is of the highest quality, characterised by red/black gems of superlative brilliance, in every conceivable pattern – including harlequins, picture stones and Chinese writing. Most of the opal is in nobby form, but the Three Mile also produces seam opal.
	Fossils include remains of molluscs, crayfish, bony fish, eels, sharks, lungfish, pliosaurs and plesiosaurs, turtles, crocodiles, pterosaurs and birds. There was also a fascinating array of dinosaurs, including dwarf forms, small sauropods, plant-eating ornithopods like hypsilophodontids and a Muttaburrasaurus, as well as the predatory theropods. Of particular interest is a very large camivorous theropod possibly resembling Velociraptor. In addition, there were four or five different

monotreme or egg-laying mammals, an unprecedented diversity of groups apparently ancestre the modern platypus and echidna.  The walls of the open cut are pierced by old workings – underground drives and ballrooms, as as the square-sided shafts that were dug with hand tools by the old-time opal miners. The disclerates of Finch claystone underlie the sandstone and make up the bands of opal dirt which in consection still exhibit the drives and pillars left by underground mining, some of which date based to the open cut has been rehabilitated by backfilling, and native trees and shrubs to the modern platypus apparently ancestre the modern platypus and echidna.
as the square-sided shafts that were dug with hand tools by the old-time opal miners. The distance of Finch claystone underlie the sandstone and make up the bands of opal dirt which in a section still exhibit the drives and pillars left by underground mining, some of which date bands
been established on most of the backfilled area.
Physical condition Good
Construction years Start year 1972 Finish year
Modifications and dates Shaft mining commenced 1906. Open cut operations commenced 1972. Worked over much of following thirty years, and partly back-filled.  HISTORY
Historical notes  The Lightning Ridge opal fields consist of low outcrops of Early Cretaceous sedimentary sandst overlain by tertiary gravels. Black opal has been mined at the Three Mile for over a century. Lu Hill, the core of the Three Mile, adjoins the Eastern Fall, McNamara's, the Gully and Flat, Hollow, and the Western Fall, an area of about 100 hectares.
Worked extensively from the earliest days, the Three Mile is recorded in annual technical geological survey reports of the NSW Department of Mines as the field with the highest produ rates well into the 1960s, yielding more opal than all other fields combined. It is impossib estimate total production. Comparisons with other areas such as the new fields at the Coocorar problematic, but it is likely that Lunatic Hill was the richest black opal field of all time.
Earliest mining methods were of course, the simplest and most arduous: pick and shovel, wind and leather bucket. In the days before mechanical processing, mullock was left on the surface, the entire Three Mile was covered in enormous heaps of top dirt. Working by candlelight and rejecting or ignoring the blue-green stones, the old-timers missed a great deal of opal. This top was processed in dry rumblers during the 1960s, a time of mechanical innovation on the fields the 1970s, new inventions such as the automatic self-tipping hoist and wet puddlers enabled fe extraction and finer processing of the opal dirt. After the late 70s, processing and washing speeded further with agitators, or cement mixer barrels.
By 1958, Lunatic Hill was 'more stoped than elsewhere andpractically worked out' and by sixties, the ground was unstable and dangerous, riddled with old drives, shafts and ballroom this time, in the absence of environmental and safety controls, one particular miner (not among present claimholders) deliberately worked the area to promote fall of the sandstone roof so Lunatic Hill could be open cut. One night around 1970, the roof dropped, a massive collapse au over great distances, which broke clear to the ground surface.
A syndicate of six miners commenced open cut operations in 1972, this method being permitted dangerous ground. A local outcry subsequently caused a moratorium but mining was resumed several years and the open cut was then worked continuously until about 2000. At one stage claims of 50 x 50m were being worked, all by independent miners.
The Lunatic Hill Syndicate open cut the Leaning Tree area at the top of the Hill in the early eight Halley's Comet, at 2200 carats the largest black nobby ever recovered and once value \$6,000,000, was won from this area. Many sections of the excavation were progressively back-feventually incorporating over 30 claims. At up to 25 metres deep, the open cut still covers see hectares and is the largest open-cut opal mine in New South Wales.

LISTINGS AND REFERENCES

Listings	National Trust of Australia Register Register of the National Estate
References	Kass, Terry: Thematic History of Walgett Shire
	Jenni Brammall, for Lightning Ridge Opal and Fossil Centre Committee, Submission to Walgett
	Shire Council, seeking heritage listing and asking Council to assume responsibility for the site, 2005
ASSESSMENT	
Historical significance	The site is the location of some of the earliest opal mining activity in Lightning Ridge. The old workings which pierce the sides of the open cut mine, some dating from 1909, comprising
	square-sided vertical shafts, horizontal drives, pillars and large underground "ballrooms,"
	illustrate the use of hand tools over many decades, the extraordinary physical stamina of the
	old-timers, and the hardships they endured.
Historical associa	
significance	the well known author lon Idriess, who with his partners was one of the first "lunatics" to dig
	shafts on the high ground at Lunatic Hill, in about 1910.
Aesthetic significance	The enormous open cut mine is a striking component of a magnificent landscape of mullock
	heaps, old mining machinery, ingenious and quirky huts, scrubby vegetation, huge skies and
	long low horizons. The old workings demonstrate a high degree of creativity, ingenuity and technical achievement.
Social significance	The mine is a focus of community sentiment in Lightning Ridge for its association with the lives
Coolar significance	of present and past residents of the town and the opal fields, who have a deep affection for the
	landscape and the history of the area, evidenced in the community's documented pressure in
	2005 to find alternatives to backfilling and rehabilitation of the area.
Technical/	The site has the potential to yield information that will enhance a our understanding of the
Research significance	geology and palaeontology of the area, and opal mining practices throughout the 20th century
D "	
Rarity	The mine is one of a few open cut opal mines, and by far the largest, in New South Wales. It provides a rare view of early opal mine workings cut by hand, and of the geological layers
	within which the opal-bearing seams lie. In its setting it presents a landscape that is unique. Its
	association with a number of literary figures is rare.

Statement of significance	The preserved fields have rare aesthetic significance as a magnificent and unique man-made and natural landscape of white soil, native vegetation, hand-cut mine workings, ingenious machinery, and a variety of rudimentary and more substantial idiosyncratic dwellings; rare historical significance demonstrating the history and processes of opal mining, and the from the turn of the 20th century; social significance as a place highly valued by the miners and other residents of Lightning Ridge, and rare technical and research significance for what it can reveal about past opal mining practices and the geology of the area
DESCRIPTION	and the geology of the droat.
Designer	
Builder/ maker	
Physical Description	The Preserved Fields are areas of early hand mining within a 32 sq. km horseshoe-shaped area around the town of Lightning Ridge. Hobby miners still sporadically mine on their small leases. The Lightning Ridge opal fields consist of low outcrops of Early Cretaceous sedimentary sandstones overlain by tertiary gravels. The highest point in the district, Sims Hill, almost 170 m above sea level, lies at the eastern end of a ridge running west for about 5 km. Other important areas include the Three Mile, Indian Lookout and Bald Hill.
	Some areas, such as the Three Mile, have a moonscape appearance, being dominated by mounds of white mullock. In others, old mine shafts, mullock heaps, mining machinery, abandoned vehicles and a variety of idiosyncratic miners' homes are set amongst native leoploldwood, wilga, budda, box, native lemon and needle bush trees abound. Some huts of adobe, timber, corrugated iron, flattened kerosene tins dating from before 1914 remain, as do several constructed between the wars. Many post-war dwellings are of similar materials, with some conventional construction and some use of concrete or ironstone.
	Nothing remains of the temporary structures of timber, hessian, kerosene tins and bark built on Sims Hill by the miners during the 1905 rush., but many old shafts remain.
	The Indian's Lookout field is a sandstone promontory south of Sims hill, and is the only place where the opal level is exposed on the surface, amid the rocky outcrops. There is a fine stand of rare needle bush, views across the adjoining pastoral lease, and a group of huts built in the 1960s from recycled materials and/or ironstone, including the Black Queen (claim 10702), Ridge Castle (12411), Rock Cabin (11768) and Bed Rock (7977).
	At Bald Hill, a small area contains many shallow hand shafts, and small dumps.
Physical condition	, and the same and

Modifications and dates	,
HISTORY	
Historical notes	Opal was discovered at Lightning Ridge in the 1880s. Prospecting and mining was begun in 1901-02 by Jack Murray and Charles Nettleton. By 1905 a rush for opals was under way, focussed on Sims Hill, and a small settlement had sprung up near the tank at Wallangulla Station. The town was

	relocated to its present position by 1912.
	Over the years the level of mining in the fields surrounding the town has fluctuated, such that the town was in decline until the introduction of electricity, piped water and paved roads from 1960. From that time the population, including migrants from all over the world, continued to grow.
	Earliest mining methods were of course, the simplest and most arduous: pick and shovel, windlass and leather bucket. In the days before mechanical processing, mullock was left on the surface, and the entire Three Mile was covered in enormous heaps of top dirt. Working by candlelight and often rejecting or ignoring the blue-green stones, the old-timers missed a great deal of opal. This top dirt was processed in dry rumblers during the 1960s, a time of mechanical innovation on the fields. By the 1970s, new inventions such as the automatic self-tipping hoist and wet puddlers enabled faster extraction and finer processing of the opal dirt. After the late 70s, processing and washing was speeded further with agitators, or cement mixer barrels.

Statement of	A rare largely intact simply built blacksmith's shop, probably dating from the expansionary period in
significance	the early 20th century, demonstrating Walgett 's role as a centre serving the surrounding rural area.
DESCRIPTION	
Designer Builder/ maker	
Physical Description	Simple single-storey building framed with unmilled logs. Gable roof and lean-to veranda.
	Galvanised iron roofing and cladding
Physical condition	Fair
Construction years	Start year Est 1910-1914 Finish year
Modifications and dates	
HISTORY Historical notes	Walgett was laid out and proclaimed, the first allotments were sold, and a post office and police
	station established, all in 1859-60. A store and hotel soon followed, but development was slow and transport and communications were poor . By 1874 the town had 18 streets, but only a few houses and no school or church. It began to boom with an influx of pastoral capital in 1876. The 1901 census recorded 779 people and 137 dwellings in the town. The establishment of a rail connection in 1908 and a return of good seasons fostered a building boom and from 1905 to 1910, the number of businesses in the town jumped from under 50 to nearly 100.
National theme	Economy
State theme	Industry
Local theme	Making a living - working with hand and eye
Further comments	The building is not recorded in the 1906 Shire rates book but the 1941 book shows it as a blacksmith's shop.

Physical condition	
Construction years	Start year 1920s Finish year
Modifications and dates	
HISTORY	As the railway lines were being laid form Burren Junction to Collarenebri and Walgett, hamlets
	sprang up at points along the routes. For three years, until the line reached Walgett in 1908, Cryon was the terminus. The inn was erected there in 1906 to cater for travellers changing from one mode of transport to another. In time, the settlement had a hotel, general store, fruit shop, post office, school and railway buildings. It was known as far as Queensland as the main shipping point for cattle to Sydney markets. After a severe wind storm on the evening of 7 October 1911, there was a flurry of activity as repairs were made to the buildings of the village, but the railway goods shed was not replaced. The hall was built in the 1920s. The inn and the hall are all that now survives of the hamlet.

HISTORY	
Historical notes	Opal was discovered at Lightning Ridge in the 1880s. Jack Murray and Charles Nettleton began prospecting and mining in 1901-02 by. By 1905 a rush for opals was under way, focussed on Sims Hill, and a small settlement had sprung up near the tank at Wallangulla Station. There were two streets with 23 timber buildings and a similar number of tents by 1906. Sanitation was a problem, and in 1908 surveyor A.W. Mullen laid out the New Town, bounded by Kopi, Gem, Harlequin and Onyx Streets. There was some resistance to moving, but between 1910 and 1912 most of the settlement had done so. Most commercial and service buildings were erected in Morilla Street.  "Pappa" Francis, a German immigrant, came from White Cliffs in 1908 and built the subject hut between 1909 and 1919. He was a popular and respected opal buyer.  Over the years the level of opal mining fluctuated, such that the town was in decline until the introduction of electricity, piped water and paved roads from 1960. From that time the population, including migrants from all over the world, continued to grow. Fire destroyed several substantial timber buildings. Many of the early miners' huts were of quite rudimentary construction, and only a handful have survived in the town or on the opal fields.

HISTORY	buildings infined, of separate interior exteriord and attached to main floase.
	George and William Colless took up a remnant piece of land ignored by other squatters about 1862 calling it Come By Chance. The village, one of the few to be privately established, later emerged on part of this station and the land on which the village it stood was granted to William Colless in 1869.  By 1888, there was a hotel in the village and Arthur Colless applied for a post office. The postal inspector was opposed to creating an official post office, but he observed, "Mr Colless is a very enterprising liberal gentleman" and proposed an arrangement with him. A post office commenced at Come-By-Chance in December 1890. A branch of the Government Savings Bank opened at the post office in 1895. Come-By-Chance remained a small privately owned village. However, the family later sold parts of the village, such as the store. When Arthur Colless died in 1921, he still owned the village, which consisted of a post office conducted by Thomas McGee, a police station conducted in one of his cottages, the Come-By-Chance hotel plus another cottage. Ten years later, when the village was again being valued after the death of William Arthur Colless, the village was described as "a few old houses and a store" and land there as "practically valueless."

HISTORY	
Historical notes	Burren Junction where the railway line branched to serve Collarenebri and Walgett was proclaimed
	as a village in 1903. A major sale of Crown allotments in the village was held in 1910. A town
	emerged with banks, school and a thriving commercial life, serving the surrounding area in which
	the large pastoral holdings had been cut into smaller holdings creating a denser population than
	before. It later became a major centre where livestock were loaded onto trains for shipment to
	saleyards. William Houlahan had converted some of his Conditional Lease, between the village and
	the main road, into a Conditional Purchase and obtained a grant of that land in 1921. A good deal of
	the village developed on this land, which was formally subdivided in 1928.
National theme	Settlement
State theme	Towns, suburbs and villages (Townships)
Local theme	Servicing the population - establishing community services
Further comments	This appears to have been the original post office.

HISTORY	
	and a few huts were positioned both in and near the new village. Before 1866, Edward Fletcher and Mr Smith made a Conditional Purchase of 40 acres on the eastern side of the Barwon River. Fletcher commenced a store on this land. In 1867, Collarenebri was measured out as a town and proclaimed. It had a store, post office and a punt to aid river crossings. Collarenebri grew very slowly until the 1880s.  A police station was established in 1882, in premises owned by Mr. MacNamara, a butcher, on the comer of Herbert and Wilson streets. There were two mounted constables, under the control of Constable Brian O Brien. A Court of Petty Sessions opened in 1884, and a public school in 1885. The Gladstone Bridge opened in 1886, confirming the role of the town in the district. By 1886, there was Brasen's Royal Hotel in Wilson and Walgett Streets, his store in Walgett Street and a cordial factory. Collarenebri in 1891 had 127 people occupying 24 dwellings. In 1900, Collarenebri had five stores, two hotels, a butcher, a baker, two blacksmiths, a doctor and its own newspaper. The opening up of 50,000 acres nearby for selection in 1897 had a stimulating effect on the town. By 1900, storekeeper W H Wordsworth claimed that since the land was subdivided in the early 1890s, trade had increased ten times.  The present police station, incorporating a barracks, was built in 1901. A court and magistrate's
National theorem	room were attached, and a cell block and stables were also built. The cells were replaced in 1962 and the stables no longer exist.
National theme State theme	Governing  Law and order
Local theme	Evolving community - extending government and bureaucracy
Further comments	
	Like many contry police stations this is on a large site, with a paddock for grazing the police horses.

the Shire, demonstrating the place of freemasonry in the life of the town in the 20th century  DESCRIPTION  Designer  Builder/ maker  Physical Description  Single-storey timber-framed hall with gabled corrugated iron roof. Supper room with lean-to roo attached on western side has false gable to front elevation. Walls and ceiling of temple lined with TG&V jointed cypress boards. Masonic furnishings and patterned floor remain.  Physical condition  Construction years  Start year  1901  Finish year  Weatherboard cladding replaced with fibre cement planks  HISTORY  Historical notes  Walgett was laid out and proclaimed, the first allotments were sold, and a post office and police station established, all in 1859-60. A store and hotel soon followed, but development was slow and transport and communications were poor . By 1874 the town had 18 streets, but only a few houses and no school or church. It began to boom with an influx of pastoral capital in 1876. The 1901 census recorded 779 people and 137 dwellings in the town. The establishment of a rail connectior in 1908 and a return of good seasons fostered a building boom and from 1905 to 1910, the numbe of businesses in the town jumped from under 50 to nearly 100. In 1906, when Walgett became the shire headquarters, most of the commercial development was in Fox Street between Warrena and Wee Waa Streets and eastwards along Wee Waa Street. Housing was largely confined to Warrena Namoi, Wee Waa, and Peel Streets, with cottages scattered about the rest of the township.  Freemsons began meeting in Walgett in 1892. The Masonic hall was built in 1901, and opened with a ceremony of dedication on 16 October 1901. The supper room was added in 1920.	ITEM DETAILS

Supper room with lean-to roo attached on western side has false gable to front elevation. Walls and ceiling of temple lined with TG&V jointed cypress boards. Masonic furnishings and patterned floor remain.  Physical condition Construction years Modifications and dates  Weatherboard cladding replaced with fibre cement planks  HISTORY Historical notes  Walgett was laid out and proclaimed, the first allotments were sold, and a post office and police station established, all in 1859-60. A store and hotel soon followed, but development was slow and transport and communications were poor. By 1874 the town had 18 streets, but only a few houses and no school or church. It began to boom with an influx of pastoral capital in 1876. The 1901 census recorded 779 people and 137 dwellings in the town. The establishent of a rail connector in 1908 and a return of good seasons fostered a building boom and from 1905 to 1910, the numbe of businesses in the town jumped from under 50 to nearly 100. In 1906, when Walgett became the shire headquarters, most of the commercial development was in Fox Street between Warenea and Wee Waa Streets and eastwards along Wee Waa Street. Housing was largely confined to Warrena and Wee Waa, and Peel Streets, with cottages scattered about the rest of the township.  Freemsons began meeting in Walgett in 1892. The Masonic hall was built in 1901, and opened with a ceremony of dedication on 16 October 1901. The supper room was added in 1920.  The Lodge ceased to meet in about 2003, and the building was acquired by Walgett Shire Council It is under the control of the Walgett and District Historical Society. significance	building in Lightning Ridge.
DESCRIPTION	
Designer	
Builder/ maker	Tom Urwin
Physical Description	Wide single storey weatherboard building with galvanised iron gambrel roof, gable over central entrance, symmetrical except for front veranda returning on one side.
Physical condition	Roof rusty, paint weathered
Construction years	Start year 1916 Finish year 1916
Modifications and dates	Insect screening to veranda
HISTORY Historical notes	Opal was discovered at Lightning Ridge in the 1880s. Prospecting and mining was begun in 1901-
	02 by Jack Murray and Charles Nettleton. By 1905 a rush for opals was under way, focussed on Sims Hill, and a small settlement had sprung up near the tank at Wallangulla Station. There were two streets with 23 timber buildings and a similar number of tents by 1906. Sanitation was a problem, and in 1908 surveyor A.W. Mullen laid out the New Town, bounded by Kopi, Gem, Harlequin and Onyx Streets. There was some resistance to moving, but between 1910 and 1912 most of the settlement had done so. Most of the commercial and service buildings were erected in Morilla Street.  The area was policed from Angledool until the police station was built in 1916. It remained in use until 1944, when it became the home of the builder's widow, then her daughter and now her grandson.  Over the years the level of opal mining fluctuated, such that the town was in decline until the introduction of electricity, piped water and paved roads from 1960. From that time the population, including migrants from all over the world, continued to grow. Many of the early miners' huts were of quite rudimentary construction, and only a handful have survived. Fire destroyed other more substantial timber buildings including several at the corner of Morilla and Opal Streets. The Imperial hotel was lost and rebuilt in 1927 and burnt down again in 2006, and the Dawson's Store (the Post Office 1932-75) was burnt down in 2003. The original police station is a rare survivor.

Statement of significance	Open air artesian baths built in 1962 as Lightning Ridge began to develop as a modern township, providing a social centre for residents and visitors and amenities to miners living on the opal fields, and demonstrating the characteristics of the Great Artesian Basin.
DESCRIPTION	
Designer	
Builder/ maker	
Physical Description	Open air swimming pool, filled with hot mineralised water drawn from the Great Artesian Basin by means of a bore.
Physical condition	Fair
Construction years	Start year 1962 Finish year
Modifications and dates	
HISTORY	
Historical notes	Over the years from the first mining of opal near Lightning Ridge in 1901, the level of mining activity fluctuated, such that the town was in decline until the introduction of electricity, piped water and paved roads from 1960. The baths opened in 1962, providing claimed therapeutic benefits as well as recreation for townspeople and visitors. For miners on the camps, the baths also provided a place to bathe, wash their clothes, relax and socialise.
National theme	Culture
State theme	Leisure
Local theme	Evolving community - enjoying leisure
Further comments	The baths illustrate the characteristics of the Great Artesian Basin: mineralised hot water flowing feely under pressure from an aquifer, in this case 1000 metres below the surface of the ground.

Physical Description	Large screen protected by galvanised iron roof supported on light steel trusses and trussed columns, facing an expansive lawn. Projection box
Physical condition	Fair
Construction years	Start year Finish year
Modifications and dates	
HISTORY Historical notes	Collarenebri emerged where tracks converged to cross the Barwon River. Stockyards and a few
	huts were positioned in and near the new village. Before 1866, Edward Fletcher and Mr Smith made a Conditional Purchase of 40 acres on the eastern side of the Barwon. Fletcher commenced a store on this land. In 1867, Collarenebri was measured out as a town and proclaimed. It had a store, post office and a punt to aid river crossings. Collarenebri grew very slowly until the 1880s. A police station was established in 1882, a Court of Petty Sessions in 1884, and a public school in 1885. The Gladstone Bridge opened in 1886, confirming the role of the town in the district. By 1886, there was Brasen's Royal Hotel in Wilson and Walgett Streets, his store in Walgett Street and a cordial factory. Collarenebri in 1891 had 127 people occupying 24 dwellings. In 1900, Collarenebri had five stores, two hotels, a butcher, a baker, two blacksmiths, a doctor and its own newspaper. The opening up of 50,000 acres nearby for selection in 1897 had a stimulating effect on the town. By 1900, storekeeper W H Wordsworth claimed that since the land was subdivided in the early 1890s, trade had increased ten times.  A travelling picture show came to Walgett in 1911 and cinemas were built in several towns between the wars. Other centres relied I on the travelling picture show of Mark Cutler, based at Collarenebri. He established the open air cinema in 1935 and his son still opens it for occasional charity showings, although the adjacent enclosed cinema operated only from its construction in 1956 until
National theme	about 1970. Culture
State theme	Leisure
Local theme	Evolving community - enjoying leisure
Further comments	The original projection box was superseded when the enclosed cinema was built with a projection room capable of serving both the enclosed and open air cinemas.

HISTORY		
	Sims Hill, and a small settlement had sprung up near the tank at Wallangulla Station. There were two streets with 23 timber buildings and a similar number of tents by 1906. Sanitation was a problem, and in 1908 surveyor A.W. Mullen laid out the New Town, bounded by Kopi, Gem, Harlequin and Onyx Streets. There was some resistance to moving, but between 1910 and 1912 most of the settlement had done so. Most of the commercial and service buildings were erected in Morilla Street. Over the years the level of opal mining fluctuated, such that the town was in decline until the introduction of electricity, piped water and paved roads from 1960. From that time the population has continued to grow.  Lightning Ridge has attracted individualistic people from all over Australia and the world, and numerous quirky structures have been built on the opal fields with a mix of natural, second-hand

Owner	Local Government
Current use	War Memorial
Former use	
Statement of	A landmark and focus of war remembrance in Walgett, and a fine example of a traditional local war
significance	memorial surmounted by a marble statue of a soldier of the first World War, demonstrating the
DESCRIPTION	response of the community to the service and sacrifice of local men who served .
Designer Builder/ maker	
Physical Description	Life-sized marble statue of a soldier on a four-sided tapering column, which in turn stands on a four-
r nysicai Description	sided marble base bearing he names of those who served. This stands on a circular rendered and
	painted brick plinth, with four curved marble plaques bearing additional names. One such plaque is
	attached to a small door providing access to wiring within the base. Spherical white lights pare
	attached to the tapering column by curved brass brackets. The memorial stands about 8 metres
	high on a roundabout in the main street
Physical condition	Slight weathering of marble and incised names, and unevenness in rendered base.
Construction years	Start year Finish year
Modifications and dates	Until construction of the roundabout, the memorial stood in the centre of the intersection. The
	original lights were replaced with utilitarian mercury lamps some years ago. Copies of the originals,
	using polycarbonate rather than glass spheres, were made from early photographs and installed in
	2005. An early photograph shows a low wrought iron fence around the top of the circular base. It is
	not evident in photographs from the late inter-war period, but it is possible to see where the uprights
HISTORY	were cut through flush with the top of the circular base.
Historical notes	In January 1919 Walgett Council invited designs for a war memorial. Within a month, five designs
Thistorical Hotes	had been submitted. The name of the selected designer is not recorded. In March 1920 Council
	decided that the names of all who had enlisted, not only those who saw active service overseas,
	should be recorded on the monument.
	In August 1921 the memorial seems to have been well on the way to completion, and the Shire
	Engineer informed Council that the statue has arrived in Sydney from Italy. In April 1922 the
	"Spectator" reported the statue and other marble work had been installed and that the work was
	complete. However the following month it was reported that the lighting of the memorial was
	regarded locally as "crude and needing much improvement." It is not known how the memorial was
	lit at that time, but in April 1922 Council decided to install electric lighting in the town. So the electric
	lights seem to have been installed soon after the memorial was built. Certainly the fluted marble
	sides of the obelisk have raised circles where the bases of the lamps are attached. The memorial
	has been the location of Anzac and Remembrance Day and Anzac Day commemorations, since 1922.

HISTORY	·	
Historical notes	The growth of pastoral holdings in the mid 19th century inspired the reservation of Travelling Stock Routes across the shire. They usually followed the rivers or ran between bores or tanks, and converged on major centres such as Walgett and Collarenebri. Along the stock routes inns were established, usually on land leased from the Crown. These were mainly for the comfort of families travelling by horse and buggy between outlying properties and towns and villages for provisions. They were not specifically for the drovers, who would socialise at the inn but camp with the stock and horses overnight. Later, Cobb and Co. and local operators began mail and passenger runs using fast horse-drawn coaches with inns and stables where teams of horses could be changed. "Euralah" homestead was the original Mercadool Hotel, the licensee being Jack Grace. A small Grace child is buried across the flat, north of the homestead. The owners believe the hotel existed in 1890. "Euralah" was a block taken of the property "Mercadool" as a Settlement Lease & Fam No. 1907/9, on 13th June 1907. It was held by Lesley Kenneth Clark, Douglas Watt 1925, Albert Theodore Hamlyn Witts 1927, .Mrs Mary Cutler 1929-'30. The present owners bought it from her son Tom Cutler's estate in 1974.

HISTORY		
	the area was taken up as pastoral land by the 1840s. George and William Colless took up a remnant piece of land ignored by other squatters about 1862. calling it Come By Chance. A village, one of the few to be privately established, later emerged on part of this station and the land on which the village it stood was granted to William Colless in 1869. By 1888, there was a hotel in the village and a post office commenced in 1890. The family later sold parts of the village, including the store. Arthur Colless died in 1921, and his son. William Arthur Colless about ten years later. When the estate was valued, the village was described as "a few old houses and a store."  William Arthur Colless is reputed to have said that the name of the Come-by-Chance property was to be buried with him. The property was divided into three, "Notrella," "Gleneda" and "Bellevue" each passing to one of his children. The homestead at "Gleneda" was built in 1927-28.

Modifications and dates	
HISTORY	Collarenebri emerged where tracks converged to cross the Barwon River. Stockyards and a few
	huts were positioned in and near the new village. Before 1866, Edward Fletcher and Mr Smith made a Conditional Purchase of 40 acres on the eastern side of the Barwon. Fletcher commenced a store on this land. In 1867, Collarenebri was measured out as a town and proclaimed. It had a store, post office and a punt to aid river crossings. Collarenebri grew very slowly until the 1880s. A police station was established in 1882, a Court of Petty Sessions in 1884, and a public school in 1885. The Gladstone Bridge opened in 1886, confirming the role of the town in the district. By 1886, there was Brasen's Royal Hotel in Wilson and Walgett Streets, his store in Walgett Street and a cordial factory. Collarenebri in 1891 had 127 people occupying 24 dwellings. In 1900, Collarenebri had five stores, two hotels, a butcher, a baker, two blacksmiths, a doctor and its own newspaper. The opening up of 50,000 acres nearby for selection in 1897 had a stimulating effect on the town. By 1900, storekeeper W H Wordsworth claimed that since the land was subdivided in the early 1890s, trade had increased ten times.  A travelling picture show came to Walgett in 1911 and cinemas were built in several towns between the wars. Other centres relied I on the travelling picture show of Mark Cutler, based at Collarenebri. He established the open air cinema in 1935 and his son still opens it for occasional charity showings, although the adjacent enclosed cinema operated only from its construction in 1956 until about 1970.

Statement of	Excellent example of a large timber and galvanised iron community hall, a focus of community life	
significance	for many years and of continuing social significance	
DESCRIPTION		
Designer		
Builder/ maker		
Physical Description	Large single-storey timber-framed hall with gabled corrugated iron roof. Supper room with lean-to roof attached on southern side.	
Physical condition	All but the top chords of one timber and steel composite roof truss replaced with a steel rod, which has induced twisting in the walls	
Construction years	Start year Finish year	
Modifications and dates	Entry porch added/replaced about 2002	
HISTORY	_	
	as a village in 1903. A major sale of Crown allotments in the village was held in 1910. A town emerged with banks, school and a thriving commercial life, serving the surrounding area in which the large pastoral holdings had been cut into smaller holdings creating a denser population than before. It later became a major centre where livestock were loaded onto trains for shipment to saleyards. William Houlahan had converted some of his Conditional Lease, between the village and the main road, into a Conditional Purchase and obtained a grant of that land in 1921. A good deal of the village developed on this land, which was formally subdivided in 1928.

Modifications and dates		
HISTORY		
Historical notes	Many of the early settlers in the Carinda area were of Irish descent, and the Roman Catholic faith is	
	consequently the predominant one in Carinda. Visiting priests from Walgett or Coonamble would	
	say Mass. The land on which the sacred Heart Church is built was donated by a Mrs. E. M. Porter.	
	The church was built in 1912.	
	In the early years, nuns form the convent at Walgett would visit each year to prepare young people for confirmation, staying at the hotel. After 1957, this work was undertaken by nuns from Parkes.

ITEM DETAILS	
Name of Item	Denyer's Store (former)
Other/group name	
Location	Wilson Street
	Collarenebri NSW 2833
Property description	Lot 3, Section 4, DP 769262
Item type	Built
Item group	Retail and wholesale
Category	Shop
Owner	Private
Current use	Vacant
Former use	Shop
Statement of	Rare surviving 19th century weatherboard gable-roofed shop with inter-war shopfront and parapet,
significance	dating from Collarenebri's period of growth and prosperity in the Federation years.
DESCRIPTION	
Designer	
Builder/ maker	
Physical Description	Pair of conjoined freestanding single storey Federation weatherboard shop with steep corrugated iron roofs. Weatherboarded gables of different heights facing the street. Early post-war shopfronts and parapets extend to building line at front.
Physical condition	Poor
Construction years	Start year Before 1898 Finish year
Modifications and dates	Area under awning and behind building line enclosed to provide larger shopfront display, with geometric parapets, during 1940s. Fibro sheeting over facade and flush doors probably 1970s.
HISTORY	
Historical notes	Collarenebri emerged along a site where tracks converged to cross the Barwon River. Stockyards and a few huts were positioned both in and near the new village. Before 1866, Edward Fletcher and Mr Smith made a Conditional Purchase of 40 acres on the eastern side of the Barwon River. Fletcher commenced a store on this land. In 1867, Collarenebri was measured out as a town and proclaimed. It had a store, post office and a punt to aid river crossings
	Collarenebri grew very slowly until the 1880s. A police station was established in 1882, a Court of Petty Sessions in 1884, and a public school in 1885. The Gladstone Bridge opened in 1886, confirming the role of the town in the district. By 1886, there was Brasen's Royal Hotel in Wilson and Walgett Streets, his store in Walgett Street and a cordial factory. Collarenebri in 1891 had 127 people occupying 24 dwellings. In 1900, Collarenebri had five stores, two hotels, a butcher, a baker, two blacksmiths, a doctor and its own newspaper. The opening up of 50,000 acres nearby for selection in 1897 had a stimulating effect on the town. By 1900, storekeeper W H Wordsworth claimed that since the land was subdivided in the early 1890s, trade had increased ten times.
Notice at the second	An early photograph shows the larger shop as the general store of John H. Wordsworth, with a saddlery, apparently part of the same establishment, in the smaller part. It is mentioned in a rhyming "Directory" in the Collarenebri Chronicle of Jan. 1898 as Walker and Wordsworth's store.
National theme	Settlement (Townships)
State theme	Towns, suburbs and villages (Townships)
Local theme	Servicing the population - supplying retail needs

Further comments

Steep gables with awnings over the footpath supported on veranda posts, were once a striking element in the streetscape of Wilson Street. Those of this shop, now largely hidden by the postwar modifications, and the three similar ones on the other Denyer store in front of the old bakery, hidden by steel siding, are all that remain. The early post-war alterations reflect the style of the rebuilding of the other side of Wilson Street after the 1938 fire.

BUILDING BURNT DOWN APRIL 2008.

HISTORY Historical notes				and mining was begun in 1901-
	02 by Jack Murray and Charles Nettleton. By 1905 a rush for opals was under way, focussed on Sims Hill, and a small settlement had sprung up near the tank at Wallangulla Station. There were two streets with 23 timber buildings and a similar number of tents by 1906. Sanitation was a problem, and in 1908 surveyor A.W. Mullen laid out the New Town, bounded by Kopi, Gem, Harlequin and Onyx Streets. There was some resistance to moving, but between 1910 and 1912 most of the settlement had done so. Most of the commercial and service buildings were erected in Morilla Street. The public school was built nearby in 1911.  Over the years the level of opal mining fluctuated, such that the town was in decline until the introduction of electricity, piped water and paved roads from 1960. From that time the population, including migrants from all over the world, continued to grow. Many of the early miners' huts were of quite rudimentary construction, and only a handful have survived. Fire destroyed other more substantial timber buildings including several at the corner of Morilla and Opal Streets.

Statement of	Possibly the oldest building in Carinda, comprising a primitive slab hut, dating from the attached to a
significance	Victorian Georgian style weatherboard and galvanised iron house, on a site first owned by Thomas
	McNamara who owned the inn around which Carinda grew.
DESCRIPTION	
Designer	
Builder/ maker	
Physical Description	The facade is a Victorian Georgian style weatherboard house with gabled roof over the front two rooms and a lean-to behind, and bullnosed veranda. The rear, and almost certainly older, part of
	the house is a traditional primitive slab hut, with walls of rough vertical eucalypt slabs set deeply into the ground.
Physical condition	Derelict
Construction years	Start year Est 1903 Finish year
Modifications and dates	
HISTORY Historical notes	From 1869, Thomas McNamara had an inn where a travelling stock route crossed the creek. The
	village of Carinda emerged here and was proclaimed in 1890. By 1898 it had a bank, in 1904 the multi-storey Grand Hotel, and by 1911 a police station and a bush nurse. In that year the population was 211. Thereafter the population declined: in 1947 it was 131. But over this period more facilities were established, including a court house, churches, a hospital, shops, two ice works, a wool scour, a second hotel, a privately owned hall, a school and a cinema.  The subject site was purchased at auction by T. J. McNamara, butcher, in March 1904. McNamara also owned the hotel around which the town grew. The land was sold to William Hardy, hotel
National theme	keeper, in 1911 the land was mortgaged shortly after it Hardy purchased it from McNamara.  Settlement
State theme	Accommodation (Housing)
Local theme	Housing the people - housing citizens
Further comments	The slab type of construction found at the rear dates from the first years of European settlement and
T ditilor comments	was used into the 20th century. It seems to have been built first, perhaps as soon as Hardy bought
	the land, or perhaps even before McNamara bought it., and is probably the oldest building in
	Carinda. Hardy's 1911 mortgage may have been to fund the construction of the front part, although
	it is Victorian rather than lat Federation in style, and could well date from 1903 or thereabouts. The
	rate book for 1906 indicated that there was a house on the site in that year.

Modifications and dates	
HISTORY	
Historical notes	Burren Junction, where the railway line branched to serve Collarenebri and Walgett, was proclaimed as a village in 1903. A major sale of Crown allotments in the village was held in 1910. A town emerged with banks, school and a thriving commercial life, serving the surrounding area in which the large pastoral holdings had been cut into smaller holdings creating a denser population than before. It later became a major centre where livestock were loaded onto trains for shipment to saleyards. William Houlahan had converted some of his Conditional Lease, between the village and the main road, into a Conditional Purchase and obtained a grant of that land in 1921. A good deal of the village developed on this land, which was formally subdivided in 1928.

A major sale of Crown allotments in the village was held in 1910. A town emerged with banks, school and a thriving commercial life, serving the surrounding area in which the large pastoral holdings had been cut into smaller holdings creating a denser population than before. It later became a major centre where livestock were loaded onto trains for shipment to saleyards. William Houlahan had converted some of his Conditional Lease, between the village and the main road, into a Conditional Purchase and obtained a grant of that land in 1921. A good deal of the village developed on this land, which was formally subdivided in 1928.  Culture  Religion  Servicing the population – enhancing family values  The Anglican Churches at Collarenebri (item 126) and Mungindi (Moree Plains Shire) are similar, the faceted bays at Mungindi having been added in 1956.  NCES  National Trust of Australia Register  Register of the National Estate  Kass, Terry: Thematic History of Walgett Shire

The opening up of 50,000 acres nearby for selection in 1897 had a stimulating effect on the town. By 1900, storekeeper W H Wordsworth claimed that since the land was subdivided in the early 1890s, trade had increased ten times  The first Anglican service in Collarenebri was held in 1898. A church was built in 1904. The present church was built in 1956 following a cyclone which destroyed the former church and rectory

Item group	Farming and grazing		
Category	Stock well/tank		
Owner	Walgett Rural Lands Protection Board		
Current use	Water storage for stock		
Former use			
Statement of	Good example of a tank or reservoir supplied by a sub-artesian bore, constructed on a travelling		
significance	stock route in 1876, and still in use.		
DESCRIPTION			
Designer			
Builder/ maker			
Physical Description	Reservoir holding water from an artesian bore, formed by excavating an area and containing it with earth banks		
Physical condition	Good		
Construction years	Start year 1876 Finish year		
Modifications and dates			
HISTORY Historical notes	The provision and management of water has been a central issue in the history of Walgett Shire		
	the 1880s of the large arterial basin underlying the Walgett area. As the drier parts of the area, well away from the rivers such as north of the Barwon developed, stock routes stretched out from one bore or tank to another. The government had a policy of putting down artesian bores along these stock routes to supply water. In 1876, T.G. Dangar suggested that a Reserve be established at Boro where a water hole, which filled in wet weather, was the only permanent water between Walgett and Goodooga. This was duly done.

HISTORY			
	and no school or church. It began to boom with an influx of pastoral capital in 1876. The 1901 census recorded 779 people and 137 dwellings in the town. The establishment of a rail connection in 1908 and a return of good seasons fostered a building boom and from 1905 to 1910, the number of businesses in the town jumped from under 50 to nearly 100. In 1906, when Walgett became the shire headquarters, most of the commercial development was in Fox Street between Warrena and Wee Waa Streets and eastwards along Wee Waa Street. Housing was largely confined to Warrena, Namoi, Wee Waa, and Peel Streets, with cottages scattered about the rest of the township.  By 1943, it had grown. While the commercial and administrative areas were much the same, the residential part had expanded considerably, to an area bounded by Montkeila, Pitt, Warrena, Namoi, Arthur, Duff, Euroka and Peel Streets. The number of buildings in the shire had only grown by 100 between the 1911 and 1947 censuses, but much of the development took place in the town itself.		
National theme	Settlement		
State theme	Accommodation (Housing)		
Local theme	Housing the people - housing citizens		
Further comments	Only a handful of public and commercial buildings survive in Walgett from the late 19th and early 20th century. A good proportion houses remain, but only a few are reasonably intact: most are encased in fibro, verandas are enclosed, and windows are aluminium.

HISTORY	_		
	station established, all in 1859-60. A store and hotel soon followed, but development was slow and transport and communications were poor . By 1874 the town had 18 streets, but only a few houses and no school or church. It began to boom with an influx of pastoral capital in 1876. The 1901 census recorded 779 people and 137 dwellings in the town. The establishment of a rail connection in 1908 and a return of good seasons fostered a building boom and from 1905 to 1910, the number of businesses in the town jumped from under 50 to nearly 100. In 1906, when Walgett became the shire headquarters, most of the commercial development was in Fox Street between Warrena and Wee Waa Streets and eastwards along Wee Waa Street. Housing was largely confined to Warrena, Namoi, Wee Waa, and Peel Streets, with cottages scattered about the rest of the township.  By 1943, it had grown. While the commercial and administrative areas were much the same, the residential part had expanded considerably, to an area bounded by Montkeila, Pitt, Warrena, Namoi, Arthur, Duff, Euroka and Peel Streets. The number of buildings in the shire had only grown by 100 between the 1911 and 1947 censuses, but much of the development took place in the town itself.		
National theme	Settlement		
State theme	Accommodation (Housing)		
Local theme	Housing the people - housing citizens		
Further comments	Only a handful of public and commercial buildings survive in Walgett from the late 19th and early 20th century. A good proportion houses remain, but only a few are reasonably intact: most are encased in fibro, verandas are enclosed, and windows are aluminium.  Rate books do not indicate a house on this site in w either 1906 or 1941: possibly relocated. Limited visibility from street.

	and gablets, extending over return veranda.
Physical condition	
Construction years	Start year Est 1910 Finish year
Modifications and dates	Rear veranda enclosed
HISTORY	
	as a village in 1903. A major sale of Crown allotments in the village was held in 1910. A town emerged with banks, school and a thriving commercial life, serving the surrounding area in which the large pastoral holdings had been cut into smaller holdings creating a denser population than before. It later became a major centre where livestock were loaded onto trains for shipment to saleyards. William Houlahan had converted some of his Conditional Lease, between the village and the main road, into a Conditional Purchase and obtained a grant of that land in 1921. A good deal of the village developed on this land, which was formally subdivided in 1928.
National theme	Settlement
State theme	Accommodation (Housing)
Local theme	Housing the people - housing citizens
Further comments	A good proportion of houses remain in Burren Junction from the Federation and inter-war periods, but only a few are reasonably intact: most are encased in fibro, verandas are enclosed, and windows are aluminium.  The subject house stands on the original school site shown on the 1903 town map.

Location	Wilson Street, Collarenebri 2833
Property description	Lot 3, Section 4, DP 769262
Item type	Built
Item group	Retail and wholesale
Category	Shop
Owner	Private
Current use	Vacant
Former use	Shop and bakery
Statement of	A rare 19th century group of shops and associated bakery of timber slab and corrugated iron, dating
significance	from Collarenebri's period of growth and prosperity in the Federation years
DESCRIPTION	
Designer	
Builder/ maker	
Physical Description	Three conjoined single-storey shops with solid timber slab walls. Steeply pitched corrugated iron roofs with gables facing the street.  At rear, freestanding bakery with solid timber slab walls and corrugated iron roof.
Physical condition	Poor
Construction years	Start year Before 1898 Finish year
Modifications and dates	Bakery extended in corrugated iron, probably pre-war
	Street frontage covered with steel siding for security
HISTORY	
Historical notes	Collarenebri emerged along a site where tracks converged to cross the Barwon River. Stockyards and a few huts were positioned both in and near the new village. Before 1866, Edward Fletcher and Mr Smith made a Conditional Purchase of 40 acres on the eastern side of the Barwon River. Fletcher commenced a store on this land. In 1867, Collarenebri was measured out as a town and proclaimed. It had a store, post office and a punt to aid river crossings  Collarenebri grew very slowly until the 1880s. A police station was established in 1882, a Court of Petty Sessions in 1884, and a public school in 1885. The Gladstone Bridge opened in 1886, confirming the role of the town in the district. By 1886, there was Brasen's Royal Hotel in Wilson and Walgett Streets, his store in Walgett Street and a cordial factory. Collarenebri in 1891 had 127 people occupying 24 dwellings. In 1900, Collarenebri had five stores, two hotels, a butcher, a baker, two blacksmiths, a doctor and its own newspaper. The opening up of 50,000 acres nearby for selection in 1897 had a stimulating effect on the town. By 1900, storekeeper W H Wordsworth claimed that since the land was subdivided in the early 1890s, trade had increased ten times.  The subject shops are mentioned in a rhyming "Directory" in the Collarenebri Chronicle of Jan. 1898 as Daly's confectionery shop and "Billy the Baker." Peter Lyons' butcher's shop may also have been part of the group.
National theme	
State theme	Towns, suburbs and villages (Townships)
Local theme	Servicing the population - supplying retail needs
Further comments	Steep gables with awnings over the footpath supported on veranda posts, were once a striking element in the streetscape of Wilson Street. The awnings are gone, and the gables of this shop, now hidden by steel siding, and the two similar ones on the other Denyer store, hidden by post-war modifications, are all that remain.

Former use	
Statement of	Good example of a Georgian style Federation house, occupied by successive teachers at Carinda
significance	Public School since the early 20th century
DESCRIPTION	
Designer	
Builder/ maker	
Physical Description	Single-storey weatherboard house with central front door and French doors either side, gabled
	galvanised iron roof continuing over front and return verandas.
Physical condition	Excellent
Construction years	Start year Est 1915 Finish year
Modifications and dates	Return veranda enclosed on one side and screened on the other. Evaporative cooler.
HISTORY	
Historical notes	From 1869, Thomas McNamara had an inn where a travelling stock route crossed the creek. The village of Carinda emerged here and was proclaimed in 1890. By 1898 it had a bank, in 1904 the multi-storey Grand Hotel, and by 1911 a police station and a bush nurse. In that year the population was 211.  Thereafter the population declined: in 1947 it was 131. But over this period more facilities were established, including a court house, churches, a hospital, shops, two ice works, a wool scour, a second hotel, a privately owned hall, a school and a cinema.

HISTORY	
Historical notes	The taking up of land for pastoral holdings inspired the reservation of stock routes across the state, which became known as Travelling Stock Routes. They usually followed the rivers and other water sources of the district. They converged on major centres such as Walgett and Collarenebri but then moved onwards to other centres such as Wee Waa, Euroka or Goodooga. Along these stock routes, inns were established usually on land leased from the crown. Small settlements grew on the stock routes, often around one of these inns.  Villages such as Goangra and Carinda emerged, some to be later graced by a proper official village or town survey. The village of Carinda was proclaimed on 8 February 1890. The mark may be

Statement of	Excellent intact examples of simple utilitarian yet handsome farm buildings, dating from around the
significance	establishment of Angledool Station in 1860; the store still used as such, the meat house
	demonstrating techniques for preserving meat in a hot climate before the era of refrigeration, using
	local and transportable materials.
DESCRIPTION	
Designer	
Builder/ maker	
Physical Description	Meat house: low structure with open sides screened with netting and pyramidal galvanised iron roof
	supported on unsawn poles. Insulating layer of bark with air space above, laid on framing under
	roof.
	Store: Well built one-roomed weatherboard building with steep hipped galvanised iron gable roof.
	Floor level about 1 metre above ground. Open verandas with earth floors and lean-to roofs on each side.
Dhysical condition	
Physical condition Construction years	Good; some rust on roofs Start year c. 1860 Finish year
Modifications and dates	Start year C. 1000 Fillish year
HISTORY	
Historical notes	The first Europeans to reach most parts of Walgett Shire were not explorers but squatters, but Sir
HISTORICAL HOLES	Thomas Mitchell crossed the Narran near Angledool in 1846. Much of the shire was taken up as
	pastoral land by the 1840s. Henry Newcomen, from Lincolnshire, took up land at Angledool in
	1860. At its maximum it occupied 180,000 acres. The present property occupies about 27,000
	acres. Newcomen died in 1884. In 1895 the property was acquired by the AML&F Co. In 1938 the
	AML&F Co. employed 32 full time men. As well as numerous Aboriginal farm workers and servants,
	a number of Chinese gardeners were employed on the property. The present owners acquired it in
	1969.
	The homestead is the third on the site, the meat house and store being the only original buildings.

Category	Homestead complex
Owner	Private
Current use	Vacant
Former use	Homestead complex
Statement of	Intact excellent example of a homestead complex dating from the late 19th century, comprising an
significance	early Federation Georgian homestead and handsome vemacular slab and weatherboard meat
	house/dairy and stables.
DESCRIPTION	
Designer	
Builder/ maker	
Physical Description	Homestead: Early Federation Georgian timber and galvanised iron homestead with pyramidal roof, central front door, French doors to front rooms, and veranda with separate straight lean-to roof. Kitchen block at side, linked by veranda which returns around sides of house and kitchen block.  Meat house and dairy: Vertical slab walls, corrugated iron roof, weatherboards to gables.
	Stables: Vertical slab walls, corrugated iron roof, weatherboards to gables, containing stalls for 4 horses; attached lean-to sulky shelter and feed room with weatherboard walls.
Physical condition	House in fair condition, paint weathered and some surface rust on roof. Meat house and dairy appear structurally sound, although very weathered. Stables: lean-to roof and stud wall partly collapsed, remainder very weathered.
Construction years	Start year c. 1890 Finish year
Modifications and dates  HISTORY	Insect screening to veranda of house and kitchen block. Fibro extensions to laundry at rear of house.
Historical notes	The first Europeans to reach most parts of Walgett Shire were not explorers but squatters. Much of
	the area was taken up as pastoral land by the 1840s. In the 1850s Thomas Dangar built the largest stockyards in Australia at Gingi, from which cattle were driven to Sydney or Newcastle. The early squatters' leases began to expire in the 1860s but the land was not viable for small selectors and many squatters were able to obtain new leases. In the mid-1860s, a drought and an outbreak of pleuro-pneumonia led to a change to sheep farming. Dams and later, artesian bores, were used, allowing allow the back country further from the rivers to be opened up. By the 1880s graziers from Victoria and the Riverina began to acquire properties. New pressure from selectors led squatters to secure key elements through improvements like homesteads, shearers' quarters, woolsheds, tanks, wool scours and sheep yards.
National theme	Glenburnie was established about 1890 and the homestead complex dates from this time.  Economy
State theme	Pastoralism
Local theme	Settling upon / managing the land - running livestock

Owner	State Rail
Current use	Rail bridge (line closed)
Former use	
Statement of	An example of technology transfer from America, the bridge is a significant technical
significance	accomplishment. Completed in 1908, it has three 18.6m timber truss spans and a further thirty 7.3r
	timber girder spans. The trusses are of 18.3m through Howe type, introduced in 1894 and built from
	1894 to 1917. Of eight bridges built of this type the post-Whitton era and during the period of PWI Railway Construction Branch, only three remain in service. Two Mile Creek Bridge is the best
	surviving example; it is the largest and is in excellent condition
DESCRIPTION	odiving oxample, it is the largest and is in excellent contained.
Designer	PWD Railway Construction Branch
Builder/ maker	PWD Railway Construction Branch
Physical Description	The bridge carries a single track 1.44m gauge railway on an open deck (with transoms). It has the
1 Hydroan Boodhpaon	following spans: twenty at 7.3m, three at 18.6m and ten at 7.3m. The 7.3m approaches are timber
	girders. The three main spans are half through Howe trusses, with seven bays timber compressio
	diagonals and steel tie rods as verticals. The piers are of timber, the inner two piers being sheete
	with horizontal timber planks.
Physical condition	Good
Construction years	Start year 19081908 Finish year
Modifications and dates	
HISTORY	
Historical notes	From 1884 onwards, Walgett had made periodic efforts to obtain a connection with the railwa
	system. The train finally steamed into Walgett on 7 November 1908 Train services sustained the
	town and district for many years, but the route was a long and circuitous one and by the 1950s, wit
	the availability of motor transport and an aerial service to the town, the railway was becoming
	joke, as its services grew ever slower and more unreliable. The abandonment of railway passenge
	services was announced in February 1974. The last passenger train ran in December 1983 (Extract from Thematic History of Walgett Shire).
National theme	, , ,
	Economy
State theme	Transport
Local theme	Labo Whitten was constrained by an 1961 Covernment decree to use mare level hardward for
Further comments	John Whitton was constrained by an 1861 Government decree to use more local hardwood for bridges rather than imported iron bridges. His successor, Henry Deane, worked under the budge
	constraints of an economic depression and pioneer line policy, so huge amounts of hardwoo
	continued to be used for transom-top openings and for timber trusses. For the latter the America
	Howe Truss was adapted from Persy Allan's road bridge trusses.

Statement of	Excellent example of a largely intact homestead complex, comprising a large Federation Georgian
significance	style station homestead, with ancillary weatherboard and slab buildings including a schoolhouse dating from about 1880, associated with the defunct village of Moongulla on the Travelling Stock Route to Collarenebri.
DESCRIPTION	
Designer	
Builder/ maker	
Physical Description	Homestead is a large single-storey Federation weatherboard house, with front verandas returning on both sides. Corrugated iron gambrel roof and broken-back roof to verandas. Front elevation is Georgian-derived, and is symmetrical except for a low polygonal hipped gablet over one corner. Central front door with leadlight glass panels, and paired double-hung windows. Complex includes, extending in a row beside the homestead, a weatherboard shearers' quarters and old kitchen Bloch, slab-walled laundry with meat house behind, and slab former schoolroom. Behind the house is weatherboard generator shed. To one side is an unmarked grave. Several hundred metres away is a group of huts and workers' quarters with galvanised iron roofs and walls of galvanised iron or weatherboard. Also in the vicinity are blacksmith's shed and other simple small buildings.
Physical condition	Excellent
Construction years	Start year Finish year
Modifications and dates HISTORY	
Historical notes	The first Europeans to reach most of Walgett Shire were not explorers but squatters. Much of the area was taken up as pastoral land by the 1840s. The early squatters' lease began to expire in the 1860s but the land was not viable for small selectors and many squatters were able to obtain new leases. In the mid-1860s, an outbreak of pleuro-pneumonia, a drought led to a change to sheep farming and the use of dams or tanks to allow the back country further from the rivers to be opened up. Later, artesian bores were sunk to provide more water. The growth of pastoral holdings in the mid 19th century inspired the reservation of Travelling Stock Routes across the shire. They usually followed the rivers or ran between bores or tanks, and converged on major centres such as Walgett and Collarenebri. Along the stock routes inns were established, usually on land leased from the Crown. Small settlements grew on the stock routes, often around the inns. These were mainly for the comfort of families travelling by horse and buggy between outlying properties and towns and villages for provisions. They were not specifically for the drovers, who would socialise at the inn but camp with the stock and horses overnight. At Moongulla, a village emerged. In 1880, John Doyle was given a licence for the Moongulla Hotel. Charles Seymour, licensee in 1900, noted that considerable traffic in wool came through Moongulla to Collarenebri, rather than to Walgett. Later, Pearse, Pickersgill and Pearse sank a bore in order to operate a wool scour at Moongulla. Roger
National theme	Close operated a wool scour there in 1900.  Economy
State theme	Pastoralism
Local theme	Settling upon / managing the land - running livestock
Further comments	The complex is some distance from the site of the former village, near a tank on the Angledool-Collarenebri Road, of which nothing remains.

· ·	success of and investment in the property.
DESCRIPTION	
Designer	
Builder/ maker	
Physical Description	Original house with vertical slab walls and steep gabled roof, with veranda on four sides.  Main house has weatherboard walls, steep gabled roof with elaborate barge boards, wide verandas on two sides, arched windows with shutters shaped to fit.
	Kitchen block adjacent to main house has weatherboard walls, hipped galvanised iron roof. Behind this is a traditional meat house, with low gabled roof, open sides, and an insulating bark roof supported under and clear of the main roof.
	Uniform colour scheme of white walls ad green f roofs, and landscaping, unify this area. Nearby is a slab building, reputedly a fort relocated to the site in 1870, with holes said to be for guns to be fired through. More distant are a series if galvanised iron shearers' quarters, blacksmith's ship, another residence.
Physical condition	Good
Construction years	Start year 1870 Finish year

HISTORY	
Historical notes	The first Europeans to reach most parts of Walgett Shire were not explorers but squatters. Much of the area was taken up as pastoral land by the 1840s. In the 1850s Thomas Dangar built the largest stockyards in Australia at Gingi, from which cattle were driven to Sydney or Newcastle. The early squatters' leases began to expire in the 1860s but the land was not viable for small selectors and many squatters were able to obtain new leases. In the mid-1860s, a drought and an outbreak of pleuro-pneumonia led to a change to sheep farming. Dams and later, artesian bores, were used, allowing allow the back country further from the rivers to be opened up. By the 1880s graziers from Victoria and the Riverina began to acquire properties. New pressure from selectors led squatters to secure key elements through improvements like homesteads, shearers' quarters, woolsheds, tanks, wool scours and sheep yards.  The property "Milrea" dates from 1865, and the original homestead from the 1870s. The main
N-E	homestead was built in 1885.

Builder/ maker		
Physical Description	Two cellars. Roof space has structural floor.	
1 Tryologi Boogripuon	Two condition recompanies had directally moon.	
Physical condition	Some subsidence. Paint very weathered.	
Construction years	Start year 1870 Finish year	
Modifications and dates	Alterations / extensions in fibro 1960s	
HISTORY		
Historical notes	The first Europeans to reach most parts of Walgett Shire were not explorers but squatters. Much of	
	the area was taken up as pastoral land by the 1840s. In the 1850s Thomas Dangar built the largest	
	stockyards in Australia at Gingi, from which cattle were driven to Sydney or Newcastle. The early	
	squatters' leases began to expire in the 1860s but the land was not viable for small selectors and	
	many squatters were able to obtain new leases. In the mid-1860s, a drought and an outbreak of	
	pleuro-pneumonia led to a change to sheep farming. Dams and later, artesian bores, were used,	
	allowing allow the back country further from the rivers to be opened up. By the 1880s graziers from	
	Victoria and the Riverina began to acquire properties. New pressure from selectors led squatters to	
	secure key elements through improvements like homesteads, shearers' quarters, woolsheds, tanks,	
	wool scours and sheep yards.	
	The property was probably established when the homestead was built, about 1870

ITEM DETAILS	
Name of Item	Boundary rider's hut
Other/group name	The Snake Hut
Location	Former "Kurrajong" property, now part of Narran Lake Nature Reserve
Property description	Not determined
Item type	Built
Item group	Farming and grazing
Category	Stockman's hut
Owner	National Parks and Wildlife Service,
	NSW Department of Environment and Conservation
Current use	Vacant
Former use	Boundary rider's hut
Statement of	Historic significance as a stockman's hut used from the early part of the 20th century until the 1970s.
significance	Aesthetic significance as a basic but well constructed building of galvanised iron local timber adzed
	only to the extent necessary.
DESCRIPTION	
Designer	
Builder/ maker	
Physical Description	Three-roomed hut, L-shaped in plan, built well above ground on cypress stumps. Intersecting gabled roof and walls of galvanised iron. Two bedrooms plus kitchen with 3m ceiling height; remains of veranda evident. Two chimneys of sheet steel. Ogee section gutters.
	Wall framing of squared cypress pine, corner posts approx. 200 mm diameter poles. Rafters also round poles, with sawn ridge and valley boards. Only one ceiling joist in each room. Nail holes indicate use of canvas ceilings, now missing, some replaced with stretched polyester bagging. Floor butted 150 x 25 mm boards. Linoleum, some very decomposed, on floors.
	Interior walls roughly painted, but some painted walls now covered with stretched bagging.
	Boarded doors, ledged and braced. One window is of cedar, with one fixed and one sliding sash each with 6 small panes, possibly 19th century. Another similar, with thicker glazing bars, 4 pane sashes, probably late federation or inter-war; remaining window missing. Windows may have been second-hand.
	Cattle yards of rough timber with steel gates nearby
Physical condition	Cattle yards of rough timber with steel gates nearby.  Building appears structurally sound. Veranda missing apart from stumps. Windows missing or
Physical condition	damaged, one door off hinges, another missing, entry steps collapsed. Small area of rot in floor.
Construction years	Start year Finish year
Modifications and	- I mon your

HISTORY	
Historical notes	"Kurrajong" originally formed part of "Boorooma," and was acquired by Arthur Frederick Lane in 1935. He ran both sheep and cattle.  His son Bob (b. 1931), was to spend most of his life on Kurrajong, being schooled by correspondence, and with his brother Jack, taking over the running of the property, which passed to them on Frederick Lane's death. Later Bob Lane took over Jack's part in the property.  Bob Lane married Elizabeth in 1962, and about that time built the cattle yards. In later years they
	ran only cattle, and the property became subject to claims for opal mining. At one point there were 700 claims on the property. The difficulties posed by these claims, and by shortages of water attributed to cotton farms upstream, led the Lanes to sell Kurrajong to the National Parks and Wildlife Service in about 1990. The property was not used for cattle after that time, but the Lanes

National theme						
Setting upon / managing the land - running livestock	N-414-	remained as caretakers for some years.				
Settling upon / managing the land - running livestock   The age of the building is not known. The cedar window could date from the 19th century, but could have been second hand. Many early huts had earth floors but the fact that this one has an elevated timber floor may be due to the risk of floods, rather than an indication that it is more recent in age. The ogee gutters are well preserved, even for this dry climate, but were rare after 1920 so are probably original. The other window is of an inter-war style.    The building could predate the First World War, and would certainly predate the Second. Nearby cattle yards were built by Robert Lane in the 1950s or early 1960s.
