

## **Collarenebri Development Project**

RDA Orana has been commissioned by Walgett Shire Council to work with the Collarenebri Community to implement a localised economic development program.

The project includes

- working with the community to develop a masterplan
- the delivery of 6 business improvement workshops and
- 3 project feasibilities

We had planned to be completely immersed in Collarenebri,,,, until covid!

Unfortunately our program of face to face community engagement has been impacted, but we still want your input!

We are seeking Expressions of Interest from locals to participate in the Community Reference Group, that will help guide the project.

We are currently following up one-on-one with those who registered to attend (cancelled sessions) or have registered interest in the project.

Next, we will draw out further info on the 'big ideas' as the overarching goal of this program is to create capacity, industry and connection in the Collarenebri community. Certainly, there will be opportunities for business training and development.

If you wish to be involved Please Register your Interest below:
